Concreteness and Specificity in Clinical Psychology Luciano L'Abate, 2015-04-10 This provocative volume updates L'Abate's signature ideas focusing in particular on the concepts of concreteness and specificity as basic tenets of evaluation and therapy Noting society's growing familiarity with technology current concerns about treatment accessibility and widespread interest in wellness promotion he argues for remote writing exercises targeted to specific client issues and monitored by the clinician instead of relying on traditional talk based therapy This attention to concreteness and specificity in baseline evaluation post treatment evaluation and follow up the author asserts is central to making treatment replicable less subject to impasses or missteps and more professional with the potential of changing how therapy is conducted as well as how clinicians are trained and practice The book's framework includes rationales models empirical data and examples of prescriptive remote writing exercises Featured in the coverage Online interventions here to stay and to grow Verifiability in clinical psychology practices Present status and future perspectives for personality and family assessment Practice without theory combining theory with practice Toward a unifying framework of human relationships PIPES Programmed Interactive Practice Exercise and Prescriptions Concreteness and Specificity in Clinical Psychology will bring a new level of discussion and debate among clinical psychology practitioners and practicing psychotherapists in private practice and the public sector

*Neurodevelopmental Mechanisms in Psychopathology* Dante Cicchetti, Elaine F. Walker, 2003-08-18 This volume represents a burgeoning perspective on the origins of psychopathology one that focuses on the development of the human central nervous system The contemporary neurodevelopmental perspective assumes that mental disorders result from etiologic factors that alter the normal course of brain development Defined here in its broadest sense neurodevelopment is a process that begins at conception and extends throughout the life span We now know that it is a complex process and that its course can be altered by a host of factors ranging from inherited genetic liabilities to psychosocial stressors This book features the very best thinking in the converging fields of developmental neuroscience and developmental psychopathology The developmental window represented is broad extending from the prenatal period through adulthood and the authors

cover a broad range of etiologic factors and a spectrum of clinical disorders Moreover the contributors did not hesitate to use the opportunity to hypothesize about underlying mechanisms and to speculate on research directions

*Beyond the Systems Paradigm* Luciano L'Abate, 2013-05-30 This monograph owes its origins to the decades old proposal by David Bakan 1968 about the duality of human experience He proposed that community and agency would be two necessary and sufficient constructs to classify and to encompass most human relationships This dichotomy has been found to be valid by a variety of contributions over the last half a century L'Abate 2009 L'Abate Cusinato Maino Colesso Scilletta 2010 Additionally the purpose of this book is to argue and assert that two important fields of psychology family and personality psychology if not already dead are conceptually empirically and practically moribund They are being superseded respectively by perhaps more appropriate perhaps more specific and more likely verifiable concepts and constructs such as intimacy and identity The traditional family still conceived as composed by two parents and two children of different gender is responsible for only one fourth of all domiciles in USA Singles same sex couples and completely different family organization complete the remaining 100% Difficulties in defining what is personality require a change in perspective and advance toward a comprehensive theory of human relationships that can and should fulfill requirements necessary to achieve an undoubtedly grandiose and ambitious universal status
