**The Leyland Octopus** Graham Edge, 2004-09-14 Rigid eight wheelers with internal combustion engines were developed as a response to requirements and opportunities embedded in the 1933 Road and Rail Traffic Act. Although AEC was first in the field in late 1934 or early 1935, Leyland was able to announce its Octopus. By the Second World War, the Octopus had become a favourite with operators known to carry a legal payload economically and reliably. After the war, the driveline of the Octopus basically remained unchanged until 1960. Specification options were few, yet the model remained a market leader with lengthy waiting lists for new chassis. The model remained in production until the late 1970s and, as AEC authority Graham Edge writes, "For most of its productive life, the Leyland Octopus was the definitive British eight-wheeler lorry." The many superb photographs in this book range from shots from the 1930s, including what is probably the first Octopus chassis and a rare TEW tipper, to 1979 and an Octopus 2 which started service that year with a compacting refuse body. The text covers the full production story and there are Appendices which give chassis and engine details.

**Juggernaut Drivers** Leslie Purdon, 2006-11-01 Leslie Purdon lives and breathes trucking. Truck and Driver. It's the 1970s. Trucker Dennis Richardson Rich revels in the laughs and camaraderie of his life on the road. He sets up a transport company in North Kent with two pals. Benny is the one with the short fuse. Rich tries to calm him down when he's not winding him up. The irrepressible Chuckles has his own way of dealing with tachographs and then there's the indispensable Jean, the rock on which they rest. The determined team go through humorous and sometimes extreme exploits as they strive to stay afloat. They run legal when they can and cut corners when necessary, gambling on the new Scandinavian trucks that are changing the industry. They are cheated out of their earnings but still come up smiling.
