

An historic expansion of Miami-Dade's transit system won't be cheap

DP= Development cost YOP= Yearly operating cost

Miami-Dade leaders are promising to implement the new "SMART" plan for expanding rail lines well into the suburbs. A new study looks at potential costs for the expansion in six corridors throughout the county. County officials say they're confident they can build and operate the new system for less. The costs listed include construction, land acquisition and other expenses tied to development.

County leaders want Washington and Florida to cover significant chunks of the construction costs, and hope federal and state grants could cover well more than half of the costs to build the lines. The study assumed rail lines for each of the six corridors. But it also included an alternative bus-rapid-transit line for the Kendall route, which typically uses express buses picking up passengers at rail-like stations.

Congress. House. Committee on Transportation and Infrastructure. Subcommittee on Water Resources and Environment,2014 Collaborating for Climate Equity Vivek Shandas,Dana Hellman,2022-05-19 This book explores the capacity of different stakeholders to work together and build urban resilience to climate change through an equity centered approach to cross sectoral collaboration Urban areas where the majority of the global population dwells are particularly vulnerable to a myriad of climate stressors the effects of which are acutely present in places and to communities that have been largely excluded from decision making processes Our need for working and

learning together is at a critical threshold yet at present the process for and understanding of inter sectoral collaborations remains a theoretical ideal and falls short of the broad appeal that many have claimed Collaborating for Climate Equity argues that researcher practitioner partnerships offer a promising pathway toward ensuring equitable outcomes while building climate resilience By presenting five case studies from the United States Chile and Mexico each chapter explores the contours of developing robust researcher practitioner collaborations that endure and span institutional boundaries The case studies included in the book are augmented by a synthesis that reflects upon the key findings and offers generalizable principles for applying similar approaches to other cities across the globe This work contributes to a nascent knowledge base on the real world challenges and opportunities associated with researcher practitioner partnerships It provides guidance to academics and practitioners involved in collaborative research planning and policymaking

The Future of Disaster Management in the U.S. Amy LePore, 2016-12-08 U S congressional debates over the last few years have highlighted a paradox although research demonstrates that emergencies are most effectively managed at the local level fiscal support and programmatic management in response to disasters has shifted to the federal level While the growing complexity of catastrophes may overwhelm local capacities and would seem to necessitate more federal engagement can a federal approach be sustainable and can it contribute to local capacity building This timely book examines local capacity building as well as the current legal policy and fiscal framework for disaster management questioning some of the fundamentals of the current system exploring whether accountability and responsibilities are correctly placed offering alternative models and taking stock of the current practices that reflect an effective use of resources in a complex emergency management system The Future of Disaster Management in the U S will be of interest to disaster and emergency managers as well as public servants and policy makers at all levels tasked with responding to increasingly complex catastrophes of all kinds

Getting to Zero Alcohol-Impaired Driving Fatalities National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Accelerating Progress to Reduce Alcohol-Impaired Driving Fatalities, 2018-04-25 Alcohol impaired driving is an important health and social issue as it remains a major risk to Americans health today surpassing deaths per year of certain cancers HIV AIDS and drownings among others and contributing to long term disabilities from head and spinal injuries Progress has been made over the past decades towards reducing these trends but that progress has been incremental and has stagnated more recently Getting to Zero Alcohol Impaired Driving Fatalities examines which interventions programs systems and policies are most promising to prevent injuries and death from alcohol impaired driving the barriers to action and approaches to overcome them and which interventions need to be changed or adopted This report makes broad reaching recommendations that will serve as a blueprint for the nation to accelerate the progress in reducing alcohol impaired driving fatalities
