Microbial Safety of Minimally Processed Foods Vijay K. Juneja, John S. Novak, Gerald M. Sapers, 2002-12-03 While minimally processed foods satisfy the increasing demand for foods with fewer preservatives higher nutritive value and fresh sensory attributes they also carry a greater risk of diseases if they are improperly handled This book explores novel food borne disease prevention solutions from the perspectives of food producers handlers consumers inspectors and researchers It reports on the latest research on assuring the microbial safety of meats poultry fish vegetables fruits and bakery products that receive less than stringent sterilizing preparation It also explores methods used for pathogen detection and preventing future pathogen occurrences and evaluates HACCP regulations and risk assessments **Handbook of Fruits and Fruit**

Processing Y. H. Hui, József Barta, M. Pilar Cano, Todd W. Gusek, Jiwan S. Sidhu, Nirmal K. Compendium of the Microbiological Spoilage of Foods and Beverages William H. Sperber, Michael P. Doyle, 2009-09-23 The increased emphasis on food safety during the past two decades has decreased the emphasis on the loss of food through spoilage particularly in developed countries where food is more abundant In these countries spoilage is a commercial issue that affects the profit or loss of producers and manufacturers In lesser developed countries spoilage continues to be a major concern The amount of food lost to spoilage is not known As will be evident in this text stability and the type of spoilage are influenced by the inherent properties of the food and many other factors During the Second World War a major effort was given to developing the technologies needed to ship foods to different regions of the world without spoilage The food was essential to the military and to populations in countries that could not provide for themselves Since then progress has been made in improved product formulations processing packaging and distribution systems New products have continued to evolve but for many new perishable foods product stability continues to be a limiting factor Many new products have failed to reach the marketplace because of spoilage issues **Microbial Hazard Identification in Fresh**

Fruits and Vegetables Jennylynd James, 2006-05-19 Keeping produce safe from the farm to the fork As health and quality conscious consumers increasingly seek out fresh fruit and vegetables participants in the food supply chain growers shippers processors and retailers must be ever more effective in safeguarding their products and protecting consumers Microbial Hazard Identification in Fresh Fruits and Vegetables is a comprehensive guide for the fresh fruit and vegetable industry to understanding and controlling the hazards that can affect their products on every leg of the journey from farm to fork From production harvesting packing and distribution to retail and consumer handling the text highlights food safety hazards and potential areas of microbial contamination examines food borne pathogens and their association with produce related outbreaks over the years and points out areas for further research to better understand the survival of pathogens on fresh produce throughout the food chain Particularly valuable to the industry are discussions of Food worker hygiene including control measures and employee training requirements Major areas of known contamination and mitigation measures Implementation of Hazard Analysis and Critical Control Points HACCP Contamination and mishandling during storage and transportation and in retail display cases Recommendations for consumer behavior with fresh produce and food handling prior to consumption in the home A case study of the economic impact of the 2003 green onion food borne outbreak A comprehensive look at both microbial hazards and available measures for their prevention this book is an essential reference for the fresh fruit and vegetable industry as well as a practical text for the education and training of scientists professionals and staff involved in managing food safety
