It covers both print and electronic resources including monographs, journals, databases, indexes and abstracting tools, websites and associations providing users with listings of authoritative informational resources of both classical and recently published works. With chapters devoted to each of the main fields in the basic biological sciences, this book offers a guide to the best and most up-to-date resources in biology. It is appropriate for anyone interested in searching the biological literature from undergraduate students to faculty researchers and librarians. The guide includes a supplementary website dedicated to keeping URLs of electronic and web-based resources up to date, a popular feature continued from the third edition.

Respiratory Infections, An Issue of Clinics in Laboratory Medicine Michael J. Loeffelholz, 2014-06-28. Acute respiratory infections are responsible for an estimated 4 million deaths annually worldwide and are the leading cause of death in children younger than 5 years. Over 1 million people in the United States are hospitalized each year with pneumonia. *Mycobacterium tuberculosis* infects one third of world's population. There are more than 1 million tuberculosis related deaths worldwide each year. Emerging resistance to multiple available antimicrobial agents has hampered the ability to treat tuberculosis and hospital acquired respiratory infections. The laboratory diagnosis of respiratory infections is an important part of patient management and treatment. In addition to culture isolation of pathogens, advances have been made in a number of non culture methods. This issue of *Clinics in Laboratory Medicine* reviews state of the art laboratory diagnosis of respiratory infections as well as the testing of susceptibility to antibiotics and antiviral agents. Among some of the respiratory infections covered are Cystic fibrosis infections, Pertussis, Pharyngitis, Fungal infections. Among the diagnostic tests are Interferon gamma release assays, Molecular diagnosis of TB, Urine antigen tests and discussion of Antibiotic resistance in nosocomial respiratory infections.
