Advances and New Perspectives in Higher Education Quality Maria Esteban, Ana B. Bernardo, Ellian Tuero Herrero, Joana R. Casanova, Antonio Cervero, 2024-04-22 The changes that have occurred in today's society require Higher Education to be highly efficient in the academic and professional preparation of young people who enter university. For that reason, universities around the globe have been advocating in recent years for an improvement in the quality of teaching learning processes. As an example, the World University Consortium 2023 currently presents among its most urgent and priority objectives the identification of the best evaluative practices of the educational processes that are carried out at the University as well as the recognition of the actions aimed at improving educational processes based on scientific evidence. In this way, it seeks to distinguish all those educational actions that are at the forefront, going from actions at the micro level such as individual teaching practices in the classroom such as the application of the flipped classroom or the use of augmented reality up to actions taken at the macro level such as those proposed in the Horizon Europe 2020 strategy.

Japanese Fashion Toby Slade, 2009-11-01 Japanese Fashion examines the entire sweep of Japanese clothing history from the sophisticated fashion systems of late Edo period kimonos to the present day, providing possible theories of how Japan made this fashion journey and linking current theories of fashion to the Japanese example. The book is unique in that it provides the first full history of the last 200 years of Japanese clothing. It is also the first book to include Asian fashion as part of global fashion as well as fashion theory. It adds a hitherto absent continuity to the understanding of historical and current fashion in Japan and is pioneering in offering possible theories to account for that entire history. By providing an analysis of how that entire history changes our understanding of the way fashion works, this book will be an essential text for all students of fashion and design.

The return of the housewife Emma Casey, 2025-04-08 An illuminating look at the world of cleanfluencers that asks why the burden of housework still falls on women. Housework is good for you. Housework sparks joy. Housework is beautiful. Housework is glamorous. Housework is key to a happy family. Housework shows that you care. Housework is women's work. Social media is flooded with images of the perfect housewife. TikTok and Instagram cleanfluencers produce endless photos and videos of women cleaning, tidying, and putting things right. Figures such as Marie Kondo and Mrs. Hinch have placed housework with its promise of a life of love and contentment at the centre of self-care and positive thinking. And yet, housework remains one of the world's most unequal institutions. Women, especially poorer women and women of colour, do most low-paid and unpaid domestic labour. In *The return of the housewife*, Emma Casey asks why these inequalities matter and why they persist after a century of dramatic advances in women's rights. She offers a powerful call to challenge the prevailing myths around housework and the naturally competent woman homemaker.
