Motor Learning and Control for Dance Donna Krasnow, Mary Virginia Wilmerding, 2015-06-22

As dance training evolves and becomes more complex knowledge of motor behavior is foundational in helping dancers learn and master new skills and become more efficient in integrating the skills Motor Learning and Control for Dance is the first resource to address motor learning theory from a dance perspective Educators and students preparing to teach will learn practical ways to connect the science behind dance to pedagogy in order to prepare dancers for performance Dancers interested in performance from the recreational to professional levels will learn ways to enhance their technical and artistic progress In language accessible even to those with no science background Motor Learning and Control for Dance showcases principles and practices for students artists and teachers The text offers a perspective on movement education not found in traditional dance training while adding to a palette of tools and strategies for improving dance instruction and performance Aspiring dancers and instructors will explore how to develop motor skills how to control movement on all levels and most important how motor skills are best taught and learned The authors noted experts on motor learning and motor control in the dance world explore these features that appeal to students and instructors alike Dance specific photos examples and figures illustrate how to solve common problems various dance genres The 16 chapters prepare dance educators to teach dancers of all ages and abilities and support the development of dance artists and students in training and performance An extensive bibliography of sports and dance science literature allows teachers and performers to do their own research A glossary with a list of key terms at the back of the book Part I presents an overview of motor behavior covering motor development from birth to early adulthood It provides the essential information for teaching posture control and balance the locomotor skills underlying a range of complex dance skills and the ballistic skills that are difficult to teach and learn such as grand battement and movements in street dance Part II explores motor control and how movement is planned initiated and executed Readers will learn how the nervous system organizes the coordination of movement the effects of anxiety and states

of arousal on dance performance how to integrate the senses into movement and how speed and accuracy interact Part III investigates methods of motor learning for dancers of all ages Readers will explore how to implement a variety of instructional strategies determine the best approaches for learning dance skills and motivate and inspire dancers This section also discusses how various methods of practice can help or hinder dancers strategies for improving the recall of dance skills and sequences and how to embrace somatic practice and its contribution to understanding imagery and motor learning Motor Learning and Control for Dance addresses many related topics that are important to the discipline such as imagery and improvisation This book will help performers and teachers blend science with pedagogy to meet the challenge of artistry and technique in preparing for dance performance *Stroke Rehabilitation* LeeAnne M. Carey, 2012-06-28 Stroke Rehabilitation Insights from Neuroscience and Imaging informs and challenges neurologists rehabilitation therapists imagers and stroke specialists to adopt more restorative and scientific approaches to stroke rehabilitation based on new evidence from neuroscience and neuroimaging literatures The fields of cognitive neuroscience and neuroimaging are advancing rapidly and providing new insights into human behavior and learning Similarly improved knowledge of how the brain processes information after injury and recovers over time is providing new perspectives on what can be achieved through rehabilitation Stroke Rehabilitation explores the potential to shape and maximize neural plastic changes in the brain after stroke from a multimodal perspective Active skill based learning is identified as a central element of a restorative approach to rehabilitation The evidence behind core learning principles as well as specific learning strategies that have been applied to retrain lost functions of movement sensation cognition and language are also discussed Current interventions are evaluated relative to this knowledge base and examples are given of how active learning principles have been successfully applied in specific interventions The benefits and evidence behind enriched environments is reviewed with examples of potential application in stroke rehabilitation The capacity of adjunctive therapies such as transcranial magnetic stimulation to modulate receptivity of the damaged brain to benefit from behavioral interventions is also discussed in the context of this multimodal approach Focusing on new insights from neuroscience and imaging the book explores the potential to tailor interventions to the individual based on viable brain networks *Skill Acquisition in Sport* A. Mark Williams, Nicola J. Hodges, 2004-07-31 Research into the development of expertise and skill acquisition in sports performance is a specific area of research within the more general field of motor skills acquisition This is a fully comprehensive and focused work on the subject Understanding Driving John A. Groeger, 2013-02-01 This book closely examines what is involved in driving It identifies the aspects of perception attention learning memory decision making and action control which are drawn upon in order to enable us to drive and the brain systems involved It attempts to show how studying tasks such as driving can help to understand how these fundamental aspects of cognition combine to facilitate performance in complex everyday tasks In doing so it shows how a very broad range of laboratory based findings can be applied and that through our attempts to apply

this knowledge to complex everyday tasks we gain in return a greater understanding of fundamental aspects of human cognition

Tutorials in Motor Neuroscience Jean Requin, George E. Stelmach, 2012-12-06 This volume represents the proceedings of a NATO Advanced Study Institute ASI on the topic of Motor Neuroscience held at the Hotel San 15 24 1990 The San Bastiano Hotel Bastiano Calcatoggio Corsica September provided a beautiful setting for the ten day ASI in a resort on the west coast of Corsica near the island's capital city of Ajaccio The motivation of this ASI originated from the success of an ASI that we organized eleven years ago at Senanque Abbey in the south of France Our earlier meeting was successful in providing some coherence to a widely scattered literature while providing up to date knowledge on motor control and learning Our goal for the second ASI was essentially the same We wanted to appraise the main theoretical ideas that currently characterize the field by bringing together many of the internationally known scientists who are doing much of the contemporary work It is our hope that these proceedings will provide some conceptual unification to an expanding and diverse literature on motor control
