**What are the Flexography Plates made out of? Answer -** The flexible polymer plate is wrapped around a cylinder. The process is very similar to lino printing. A plate is made for each colour used.

**What is Offset Lithography? Answer -** This is one of the most common printing processes

**What is the Offset Lithography process? Answer -** The process uses a thin aluminium printing plate wrapped around a cylinder.

The printing plate uses a photo sensitive emulsion which attracts the ink

The paper or card passes between the offset cylinder and the impression cylinder and picks up the image

**What does full Colour Lithographic printing involve? Answer -** involves the paper being passed through four different printing plates .

**What four colour plates need to be created for Full colour printing? Answer -** cyan, magenta, yellow and black.

**How is a full colour image separated? Answer -** It can be separated into cyan, magenta, yellow and black so that a printing plate can be produced for each.
