## **Old Masters And Young Geniuses The Two Life Cycles Of Artistic Creativity:**

**Old Masters and Young Geniuses** David W. Galenson, 2006 When in their lives do great artists produce their greatest art Do they strive for creative perfection throughout decades of painstaking and frustrating experimentation or do they achieve it confidently and decisively through meticulous planning that yields masterpieces early in their lives By examining the careers not only of great painters but also of important sculptors poets novelists and movie directors Old Masters and Young Geniuses offers a profound new understanding of artistic creativity Using a wide range of evidence David Galenson demonstrates that there are two fundamentally different approaches to innovation and that each is associated with a distinct pattern of discovery over a lifetime Experimental innovators work by trial and error and arrive at their major contributions gradually late in life In contrast conceptual innovators make sudden breakthroughs by formulating new ideas usually at an early age Galenson shows why such artists as Michelangelo Rembrandt C zanne Jackson Pollock Virginia Woolf Robert Frost and Alfred Hitchcock were experimental old masters and why Vermeer van Gogh Picasso Herman Melville James Joyce Sylvia Plath and Orson Welles were conceptual young geniuses He also explains how this changes our understanding of art and its past Experimental innovators seek and conceptual innovators find By illuminating the differences between them this pioneering book provides vivid new insights into the mysterious processes of human creativity

*Late Style and its Discontents* Gordon McMullan, Sam Smiles, 2016-10-06 Late style is a critical term routinely deployed to characterise the work of selected authors composers and creative artists as they enter their last phase of production often but not only in old age Taken at face value this terminology merely points to a chronological division in the artist's oeuvre late being the antonym of early or the third term in the triad early middle late However almost from its inception the idea of late style or late work has been freighted with aesthetic associations and expectations that promote it as a special episode in the artist's creative life Late style is often characterised as the imaginative response made by exceptional talents to the imminence of their death In their confrontation with death creative artists critics claim produce work that is by turns a determination to continue while strength remains a summation of their life's work and a radical vision of the essence of their craft And because this creative phenomenon is understood as primarily an existential response to a common fate so late style is understood as something that transcends the particularities of place time and medium Critics seeking to understand late work regularly invoke the examples of Titian Goethe and Beethoven as exemplars of what constitutes late work proposing that something unites the late style of authors composers and creative

artists who otherwise would not be bracketed together and that lateness per se is a special order of creative work The essays in this collection resist this position Ranging across literature the visual arts music and scientific work the material assembled here looks closely at the material biographical and other contexts in which the work was produced and seeks both to question the assumptions surrounding late style and to prompt a more critical understanding of the last works of writers artists and composers Ideators Piero Formica,2022-03-09 Ideators Their Words and Voices presents the concept of ideation and its applications in a thorough yet accessible format focusing on the process of idea creation and also presents a series of protagonists of creativity and innovation who will reflect on their own career changes **The Art of**
