Dolan, Alexander Rehding, 2021-09-15 With essays covering an array of topics including ancient Homeric texts contemporary sound installations violin mutes birdsong and cochlear implants this volume reveals the richness of what it means to think and talk about timbre and the materiality of the experience of sound *Electronic Inspirations* Jennifer Iverson, 2019 For a decimated post war West Germany the electronic music studio at the WDR radio in Cologne was a beacon of hope Jennifer Iverson s Electronic Inspirations Technologies of the Cold War Musical Avant Garde traces the reclamation and repurposing of wartime machines spaces and discourses into the new sounds of the mid century studio In the 1950s when technologies were plentiful and the need for reconstruction was great West Germany began to rebuild its cultural prestige via aesthetic and technical advances

The studio's composers collaborating with scientists and technicians coaxed music from sine tone oscillators noise generators band pass filters and magnetic tape Together they applied core tenets from information theory and phonetics reclaiming military communication technologies as well as fascist propaganda broadcasting spaces The electronic studio nurtured a revolutionary synthesis of science technology politics and aesthetics Its esoteric sounds transformed mid century music and continue to reverberate today Electronic music echoing both cultural anxiety and promise is a quintessential Cold War innovation

**Sonic Writing** Thor Magnusson, 2019-02-21 Sonic Writing explores how contemporary music technologies trace their ancestry to previous forms of instruments and media Studying the domains of instrument design musical notation and sound recording under the rubrics of material symbolic and signal inscriptions of sound the book describes how these historical techniques of sonic writing are implemented in new digital music technologies With a scope ranging from ancient Greek music theory medieval notation early modern scientific instrumentation to contemporary multimedia and artificial intelligence it provides a theoretical grounding for further study and development of technologies of musical expression The book draws a bespoke affinity and similarity between current musical practices and those from before the advent of notation and recording stressing the importance of instrument design in the study of new music and projecting how new computational technologies including machine learning will transform our musical practices Sonic Writing offers a richly illustrated study of contemporary musical media where interactivity artificial intelligence and networked devices disclose new possibilities for musical expression Thor Magnusson provides a conceptual framework for the creation and analysis of this new musical work arguing that contemporary sonic writing becomes a new form of material and symbolic design one that is bound to be ephemeral a system of fluid objects where technologies are continually redesigned in a fast cycle of innovation
