Extraterritorialities in Occupied Worlds Extraterritory Project, 2016 The concept of extraterritoriality designates certain relationships between space law and representation This collection of essays explores contemporary manifestations of extraterritoriality and the diverse ways in which the concept has been put to use in various disciplines Some of the essays were written especially for this volume others are brought here together for the first time The inquiry into extraterritoriality found in these essays is not confined to the established boundaries of political conceptual and representational territories or fields of knowledge rather it is an invitation to navigate the margins of the legal juridical and the political but also the edges of forms of representation and poetics Within its accepted legal and political contexts the concept of extraterritoriality has traditionally been applied to people and to spaces In the first case extraterritorial arrangements could either exclude or exempt an individual or a group of people from the territorial jurisdiction in which they were physically located in the second such arrangements could exempt or exclude a space from the territorial jurisdiction by which it was surrounded The special status accorded to people and spaces had political economic and juridical implications ranging from immunity and various privileges to extreme disadvantages In both cases a person or a space physically included within a certain territory was removed from the usual system of laws and subjected to another In other words the extraterritorial person or space was held at what could be described as a legal distance In this respect the concept of extraterritoriality presupposes the existence of several competing or overlapping legal systems It is this notion of being held at a legal distance around which the concept of extraterritoriality may be understood as revolving

Renegotiating Masculinities in European Digital Spheres Inês Amaral, Rita Basílio de Simões, Sofia José

Santos, 2024-11-18 This book explores from a feminist and intersectional perspective how masculinities have been renegotiated in today's European digital sphere. By considering new gender-based European trends and scenarios for example, #MeToo, gender ideology and cultural backlash, the book addresses masculinities in a time of social, political, economic and cultural transformations in Europe. Bringing together research focused on online media representations of what it means to be and behave like a man in today's Europe and the way audiences have reacted to those representations, the analysis contributes to a comprehensive reflection on the stereotypes that underlie discourses in online media and how audiences co-opt, confront, criticize, renegotiate and seek to promote gender alternatives that challenge gender in equity. This timely volume will be of interest to all scholars and students of media studies, digital and new media, gender and masculinity, feminism, digital cultures, critical cultural studies, European cultural studies and sociology. **Routledge Handbook of East Asian Popular Culture**

Koichi Iwabuchi, Eva Tsai, Chris Berry, 2016-12-01 Since the 1990s there has been a dramatic increase in cultural flows and connections between the countries in the East Asian region. Nowhere is this more apparent than when looking at popular culture, where uneven but multilateral exchanges of Japanese, Korean, Taiwanese, Hong Kong and Chinese products have led to the construction of an East Asian Popular Culture. This is both influenced by and in turn influences the national cultures and generates transnational co-production and reinvention. As East Asian popular culture becomes a global force, it is increasingly important for us to understand the characteristics of contemporary East Asian popular culture and in particular its transnational nature. In this handbook, the contributors theorize East Asian experiences and reconsider Western theories on cultural globalization to provide a cutting-edge overview of this global phenomenon. The Routledge Handbook of East Asian Popular Culture will be of great interest to students and scholars of a wide range of disciplines including Cultural Studies, Media Studies, Communication Studies, Anthropology, Sociology and Asian Studies in general. Cyberculture and the Subaltern Radhika Gajjala, 2012-11-24 Cyberculture and the Subaltern: Weavings of the Virtual and Real, edited by Radhika Gajjala, maps how voice and silence shape online space in relation to offline actualities. Thus it weaves the virtual and real in relation to so-called old and new technologies, using globalization and technology as the frame for examination. Implicit in this investigation is the question of how offline actualities and online cultures are in turn shaped by online hierarchies as well as different kinds of local access to global contexts. This book reveals the logic of particular global-local directions that emerge within digital transnational capital and labor flows. To this end, the contributors to this volume examine various sites and intersections through critical lenses enabled by conversations and writings in subaltern studies, affect theory, postcolonial feminist theory, critical cultural studies, communication studies, critical development studies and science and technology studies. Contexts explored in this collection include microfinance, online handloom contexts from India and Africa in relation to development discourse, new technologies and virtual world marketing. Through actual, auto-ethnographic engagement
