Online Regulating Reproductive Donation Susan Golombok:

Regulating Reproductive Donation Susan Golombok, 2016-04 Brings together different disciplinary perspectives and new empirical insights to explore the regulation of assisted reproduction around the world **IVF and Assisted Reproduction** Sarah Ferber, Nicola J. Marks, Vera Mackie, 2020-12-17 This is the first transnational history of IVF and assisted reproduction It is a key text for scholars and students in social science history science and technology studies STS cultural studies and gender and sexuality studies and a resource for journalists policymakers and anyone interested in assisted reproduction IVF was seen as revolutionary in 1978 when the first two IVF babies were born in the UK and India Assisted reproduction has now contributed to the birth of around ten million people The book traces the work of IVF teams as they developed new techniques and laid the foundations of a multi billion dollar industry It analyses the changing definitions and experience of infertility the markets for eggs and children through surrogacy cross border reproductive treatment and the impact of regulation Using interviews with leading IVF figures archives media reports and the latest science it is a vital addition to the field of reproduction studies This pathbreaking account of the global forces behind the rapid rise of the fertility industry is the first to offer such a truly comprehensive overview of this hugely important topic Sarah Franklin Chair of Sociology University of Cambridge In this compelling overview of one of the most significant technological and social interventions ever developed the cultural and scientific imaginaries of assisted reproduction meet the obdurate histories of laboratory experiments biological materials and personal quests It is an indispensable read for anyone interested in IVF and assisted reproduction Andrea Whittaker Professor of Anthropology Monash University Regulating the Body Austin Sarat, Susanna Lee, 2025-08-05 How legal regulation of the body is practiced and justified Regulating the Body examines the practice of legal regulation of the body and how it has been justified The essays in this anthology trace the ideological moral and religious arguments for increasing the reach of regulation and authorizing punishment for infractions Bringing together leading scholars in the law and humanities this volume examines the practices and discourses used to regulate the body concentrating on scenarios where ethical and legal inconsistencies abound The regulations examined herein range from the sale of gametes parental rights over children's genetic information debates about masking discourse regarding vaccines and abortion anti transgender legislation and the control of inmates bodies on death row These are situated within a cultural and political environment that values regulation and punishment over our long standing constitutional protections At a time where rhetoric around regulation of the body is becoming increasingly incendiary Regulating the Body reveals worsening legal hypocrisies and unmask the threats to both personal autonomy and the claims of law itself Plädoyer für die Legalisierung der Leihmutterchaft Sophie-Marie Humbert, 2023-10-17 Zahlreiche Menschen in Deutschland sind ungewollt kinderlos Oft kann der Kinderwunsch heute mithilfe reproduktionsmedizinischer Behandlungen ermöglicht werden Hat eine Frau keine Gebärmutter oder will sich ein Männerpaar seinen Kinderwunsch erfüllen stösst die Reproduktionsmedizin jedoch

an ihre Grenzen In diesen Fällen biete die Leihmutterschaft einen Weg aus der ungewollten Kinderlosigkeit den das geltende deutsche Recht allerdings versperre Die Beschränkung der reproduktiven Selbstbestimmung wird verstärkt kritisiert und auch der aktuelle Koalitionsvertrag öffnet sich der Möglichkeit der Legalisierung der Leihmutterschaft Ob die Argumentation gegen Leihmutterschaft die Beibehaltung der geltenden Rechtslage erfordert und wie ein alternatives Regelungskonzept aussehen könnte untersucht Sophie Marie Humbert Dabei beschränkt sie sich nicht auf eine rein rechtliche Diskussion sondern bezieht massgeblich moralphilosophische Literatur sowie die einschlägige Studienlage ein **Familiengründung mittels Eizellspende** Clemens Heyder, 2023-10-04 Ein striktes Verbot der Eizellspende ist in einer liberalen Gesellschaft nicht gerechtfertigt Dennoch ist sie mit Problemen behaftet die nicht ignoriert werden sollten Diese Arbeit untersucht jene Probleme aus moralphilosophischer Perspektive und zeigt Rahmenbedingungen auf wie ein guter Umgang mit der Eizellspende gelingen kann Zusätzlich werden zahlreiche Schnittstellen zu anderen Fortpflanzungsverfahren herausgestellt

Conceiving People Daniel Groll, 2021-08-24 Each year tens of thousands of children are conceived with donated gametes sperm or eggs Some know the identity of their donors Others never will Questions about what donor conceived people should know about their genetic progenitors are significant for literally millions of people including donor conceived people their parents and donors But the practice of gamete donation also provides a vivid occasion for thinking about questions that matter to everyone What is the value of knowing who your genetic progenitors are How are our identities bound up with knowing where we come from In Conceiving People Identity Genetics and Gamete Donation Daniel Groll argues that people who plan to create a child with donated gametes should choose a donor whose identity will be made available to the resulting child This is not Groll argues because having genetic knowledge is fundamentally important Rather it is because donor conceived people are likely to really care about having genetic knowledge and parents should care about what their kids care about *Donors* Petra Nordqvist, Leah Gilman, 2022-10-14 Drawing on interviews with donors their kin and fertility counsellors the authors discuss what donation stories can tell us about contemporary understandings of connectedness time and morality in the context of reproduction and family life and consider how reproductive openness might be done differently

Eggonomics Diane M. Tober, 2024-10-18 What happens when people are reduced to products By pulling back the clinical curtain on the multi billion dollar per year global egg industry that is the central question Eggonomics seeks to address Tracing the emotional and physical journeys egg donors embark upon as suppliers of valuable commodities this book reveals uncomfortable realities at the heart of the industry Donors and the eggs they provide are absolutely essential to helping others create the families of their dreams But not all clinics treat their donors as well as their paying patients and many donors suffer as a result Technological innovations allow the egg donation industry to expand fueling the private equity incursion into fertility medicine turning once private clinics into highly profitable multinational conglomerates Drawing upon international anthropological fieldwork Eggonomics reveals the clinical spaces where egg donor s bodies are tested prodded

and poked for ever increasing sums of profit eugenic forces drive donor selection and the unrelenting pressures of global capitalism threaten medicine's prime directive of do no harm. Timely meticulously researched and written with surgical precision *Eggonomics* is a crucial read for researchers, medical professionals, policymakers and anyone considering becoming or using an egg donor.

(K)information Maren Klotz, 2014-05-15 Openness about gamete i.e. sperm or egg donation and the regulation of donor anonymity or non anonymity are new phenomena. How do affected families, clinics and regulators deal with information about the donors and the donation in Germany and Britain? And how does this knowledge management contribute to the making and doing of kinship? Addressing these questions through an ethnographic exploration, this book makes a comparative contribution to the empirical and theoretical analysis of kin formation and social change in plural late modern societies in Europe. The research demonstrates a contemporary re negotiation of the values of privacy, information sharing and connectedness with transparency as moral imperative, not genetics. Instead of an unambiguously discernible geneticisation, the findings on donor non anonymity and parental openness display a pattern of transparentization. In ensemble, a shift of authority becomes evident, more minute in Germany than in Britain, towards concerned groups, parents, by donation and policy makers away from a sometimes high handed reproductive medical profession.

Reproductive Donation Martin Richards, Guido Pennings, John B. Appleby, 2012-07-05 Reproductive donation is the most contentious area of assisted reproduction. Even within Europe there are wide variations in what is permitted in each country. This multidisciplinary book takes a fresh look at the practices of egg, sperm and embryo donation and surrogacy, bringing together ethical analysis and empirical research. New evidence is offered on aspects of assisted reproduction and the families these create, including non traditional types. One of the key issues addressed is should children be told of their donor origin? If they do learn the identity of their donor, what kinds of relationships may be forged between families, the donor and other donor sibling families? Should donation involve a gift relationship? Is intra familial donation too close for comfort? How should we understand the growing trend for reproductive tourism? This lively and informed discussion offers new insights into reproductive donation and the resulting donor families.

Between Families and Frankenstein Erin Heidt-Forsythe, 2018-06-22 In the United States egg donation for reproduction and egg donation for research involve the same procedures, the same risks and the same population of donors, disadvantaged women at the intersections of race and class. Yet cultural attitudes and state level policies regarding egg donation are dramatically different depending on whether the donation is for reproduction or for research. Erin Heidt Forsythe explores the ways that framing egg donation itself creates diverse politics in the United States, which unlike other Western democracies has no centralized method of regulating donations, relying instead on market forces and state legislatures to regulate egg donation and reproductive technologies. Beginning with a history of scientific research around the human egg, the book connects historical debates about the natural reproduction and unnatural research uses of women's eggs to contemporary political regulation of egg donation. Examining

egg donation in California New York Arizona and Louisiana and coupled with original data on how egg donation has been regulated over the last twenty years this book is the first comprehensive overview and analysis of the politics of egg donation across the United States Family Building Through Egg and Sperm Donation Machel M. Seibel, Susan L. Crockin, 1996 In this compilation of essays a variety of professionals writing chapters in areas of their expertise seek to reconcile alternative methods of family creation to those considered the traditional norms Seibel and Crockin have woven these essays to form a multidisciplinary sourcebook unlike any other Journal of Law and Medicine Margaret Coady, Kerry Petersen, 2002
