**Infantry** ,1998 *The Great Deception* Christopher Booker, Richard North, 2005-01-01 The Great Deception shows how the most ambitious political project of our time has for more than 50 years been based on a colossal confidence trick the systematic concealment from the people of Europe of what the aim of this project has always been since its inception in the late 1940s Updated to include the recent developments in Europe including the referendum and the upcoming votes in France and Holland As it reveals for the first time the true story behind the long term plan to build a politically united Europe the authors show how all previous attempts to reconstruct the history of this project whether written by Europhiles or Eurosceptics have got it wrong at almost every step along the way With all the suspense of a detective story drawing on thousands of books papers and official documents many of which have only become publicly available in the past few years

the book traces how a handful of determined visionaries set out more than half a century ago to weld the countries of Europe into a single political state

**Propaganda and Information Warfare in the Twenty-First Century** Scot Macdonald, 2006-12-05 This is the first book to analyze how the technology to alter images and rapidly distribute them can be used for propaganda and to support deception operations In the past propagandists and those seeking to conduct deception operations used crude methods to alter images of real people events and objects which could usually be detected relatively easily Today however computers allow propagandists to create any imaginable image still or moving with appropriate accompanying audio Furthermore it is becoming extremely difficult to detect that an image has been manipulated and the Internet television and global media make it possible to disseminate altered images around the world almost instantaneously Given that the United States is the sole superpower few if any adversaries will attempt to fight the US military conventionally on the battlefield Therefore adversaries will use propaganda and deception especially altered images in an attempt to level the battlefield or to win a war against the United States without even having to fight militarily

**Confronting Nature** T. Pinch, 1986-04-30 What happens when scientific experiments do not yield expected results when our knowledge of Nature is seriously challenged This book is about such a case an experiment that was set up to detect neutrinos coming from the Sun and thus confirm hydrogen fusion as its energy source The results were very surprising the expected fluxes of neutrinos were not found and the problem remains unsolved to this day Drawing on interviews and correspondence the author builds up a detailed picture

of how scientists cope with the unexpected Many of the problems and uncertainties encountered at the research frontiers of modern science are documented The study is unique in that it attempts to write the history of science before the scientific facts are available Pinch argues that such work can better capture the full potential of science potential that is greatly curtailed once scientific consensus emerges The study falls within the growing body of social constructivist work on science and will be of interest to all scholars who attempt to understand scientific change and development Inside front dust jacket flap
