Transforming Schools Using Project-Based Learning, Performance Assessment, and Common Core Standards

Bob Lenz, Justin Wells, Sally Kingston, 2015-01-08 It's not what students know but what they do with what they know that is important. Schools are changing in response to this reality and in *Transforming Schools Using Project Based Learning Performance Assessment and Common Core Standards* Bob Lenz, Justin Wells and Sally Kingston draw on the example of the Envision Education schools as well as other leading schools around the country to show how the concept of deeper learning can meet the need for students who are both college and career ready and engaged in their own education. In this book the authors explain how project based learning can blend with Common Core aligned performance assessment for deeper learning. You'll discover how many schools have successfully made the transition from traditional teacher centered learning to project based deeper learning and find many practical ideas for implementation. Companion DVD and website include videos showing how to implement deeper learning strategies in the classroom. Evidence based descriptions show why deeper learning is right for students. Performance assessment experts explain how to align assessments with Common Core by shifting the emphasis from knowing to doing. Extensive game plan section provides step by step guidance for change. Schools are complex organizations and transformation involves all of the stakeholders from students to superintendents. But as this book shows there are amazing benefits to be realized when everyone commits to diving deeper into learning.

Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science

Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies **Successfully Implementing Problem-Based Learning in Classrooms**
