Choose a Website and Find the Data Privacy Policy

Choose an app, website, or other online service you are familiar with to research their data policy. The easiest way to find a data policy, if it exists, is to search for the company name followed by the terms "data policy" or "privacy policy."

Your website or app: Ea Sports

What Is Their Data Policy?

Respond to the questions below. Even if you can't find information, you should record where you looked and the fact that you can't find it. If there isn't a policy or it's hard to find, that can be just as interesting as seeing the policy itself.

Question 1: What kinds of data is collected?

Your EA Account information, including your email address, username, real name, country, date of birth, telephone number and password; Security questions and answers; Information you provide in response to surveys about their Services; Information you provide when seeking help from them, such as your name, telephone number, and records (including call recordings) of the issues you experience; and Billing information, such as your name, payment card number, payment account details, and shipping address.

Question 2: How is the data you listed above being used? What features are enabled by the data?

It is used to help them validate their decisions, identify the next great thing, and pursue the unknown through experimentation.

Question 3: Does the company share the data with anyone else? Who?

They may share your information with third parties to serve you offers for EA products and services, or offers from their third-party advertising partners.

Question 4: Can you get access to your own data? Can you modify what is collected, or delete your data if you wish?

Yes, you have access to your data by logging in. You can update all account information (like your email address, name, date of birth, and more), but there could be restrictions based on your country's laws, and your ID can only be changed once every 72 hours.
