Cross, 2018-02-09 This book provides a comprehensive analysis of the Chinese Russian bilateral relationship grounded in a

historical perspective and discusses the implications of the burgeoning strategic partnership between these two major powers for world order and global geopolitics. The volume compares the national worldviews, priorities and strategic visions for the Chinese and Russian leadership, examining several aspects of the relationship in detail. The energy trade is the most important component of economic ties, although both sides desire to broaden trade and investments. In the military realm, Russia sells advanced arms to China and the two countries engage in regular joint exercises. Diplomatically, these two Eurasian powers take similar approaches to conflicts in Ukraine and Syria and also cooperate on non-traditional security issues including preventing coloured revolutions, cyber management and terrorism. These issue areas illustrate four themes: Russia and China have common interests that cement their partnership, including security, protecting authoritarian institutions and re-shaping aspects of the global order. They are key players, not only influencing regional issues but also international norms and institutions. The Sino-Russian partnership presents a potential counterbalance to the United States and democratic nations in shaping the contemporary and emerging geopolitical landscape. Nevertheless, the West is still an important partner for China and Russia. Both seek better relations with the West but on the basis of mutual respect and equality. Lastly, Russia and China have frictions in their relationship and not all of their interests overlap. The Sino-Russian relationship has gained considerable momentum, particularly since 2014, as Moscow turned to Beijing, attempting to offset tensions with the West in the aftermath of Russia's annexation of Crimea and intervention in Ukraine. However, so far, China and Russia describe their relationship as a comprehensive strategic partnership but they are not allies.

Geopolitical Change and the Antarctic Treaty System Shirley V. Scott, Tim Stephens, Jeffrey McGee, 2024-12-27. This book explores how geopolitical tensions have shaped the Antarctic Treaty System (ATS) and offers insights into managing future challenges. The ATS, established with the 1959 Antarctic Treaty during the Cold War, has been a successful model of international governance, ensuring Antarctica's peaceful use and environmental protection. However, the ATS now faces new pressures, including an expanded membership of 57 states, increased economic activities such as tourism, fishing, and bio-prospecting, and the impacts of climate change. These factors are exacerbating geopolitical tensions that could challenge the stability of the ATS. The book examines key moments in the history of the ATS to understand how past tensions were managed and what lessons can be drawn for the future. The volume covers the creation of the CCAMLR marine conservation treaty in the late 1970s/1980s, the developing world's opposition to the ATS in United Nations debates during the 1980s/1990s, the shift from permitting Antarctic mining to establishing the Madrid Protocol on Environmental Protection in the early 1990s, the formation of the International Association of Antarctic Tourism Operators, the management of Illegal, Unregulated, and Unreported (IUU) fishing in the 2000s, and the proposals for marine protected areas under the CCAMLR Convention in recent years. Several contributions also draw on critical and regional perspectives to make sense of geopolitical pressures on Antarctic governance and how they might play out over the years and decades ahead. Through its attention both to critical turning points in the

history of the ATS and a broad range of conceptual approaches the book provides an authoritative assessment of the ATS's capacity to address emerging geopolitical stresses and provides strategies for future governance. It is a timely resource for understanding the evolving dynamics in Antarctica and ensuring the region remains a zone of peace and scientific collaboration. This book is a companion volume to McGee, Edmiston, and Haward 2022 *The Future of Antarctica Scenarios* from *Classical Geopolitics in the Springer Polar Sciences Series*. New Zealand's Geopolitics and the US-China Competition Reuben Steff, 2025-01-31. This book advances the establishment of a contemporary New Zealand geopolitical tradition. It details and examines New Zealand's geopolitical reality in an increasingly fractured global security dis-order defined by interdependent strategic competition and emerging multipolarity. A centrepiece is the multidimensional US-China Great Power Competition that has the makings of a Second Cold War. This has immense implications for New Zealand's greater region, the Indo-Pacific and its immediate area, the South Pacific. The latter is of existential importance to New Zealand becoming an active area of strategic competition as China projects its influence southwards and New Zealand, Australia, and the United States respond. In this context, New Zealand's location is increasingly geopolitically relevant and the idea it occupies a benign security environment has now been cast into the dustbin of history. The decisions it makes presently will determine the country's prosperity and geostrategic security for decades. Geopolitical theory along with a detailed empirical account of strategic competition in the Indo-Pacific and South Pacific offers a clear exposition of the implications of US-China competition for New Zealand. This directs us to the nation's material characteristics and imperatives that flow from it. The book also appraises the country's strategic options and indicates how and why Wellington's approach has shifted over time from hedging between the US and China to increasingly balancing against Beijing's efforts to alter the global and regional status quo. Through analysis and provocation, this book marks a major new contribution that will interest policymakers, academics, students, and everyday citizens.

Five Rising Democracies Theodore J. Piccone, 2016. The spread of democracy and human rights over the last three decades has dramatically changed the international landscape. In 1989, just over 2 billion people lived in one of the 69 countries considered an electoral democracy. Today, those numbers have almost doubled, with more than 4 billion people living in one of the world's 125 democracies. Political reforms in places like the Philippines, Chile, Poland, South Korea, and Mexico have captured the world's attention and inspired renewed hope for an international liberal order founded on democracy, peace, and development. More recently, however, shifting power balances are shaking the foundations of the international liberal order and disrupting movements toward democracy and human rights. Established democracies are falling victim to apathy, polarization, and rising nationalism, while others are either at a plateau or backsliding on their path to liberal democracy. International cooperation to protect and expand the hard-won gains of the post-Cold War years is faltering as China, Russia, and other authoritarian states defend their illiberal paths to development. In
