## **Pdf Insurgent Democracy Nonpartisan American Politics:**

Insurgent Democracy Michael J. Lansing, 2015-11-06 In 1915 western farmers mounted one of the most significant challenges to party politics America has seen the Nonpartisan League which sought to empower citizens and restrain corporate influence Before its collapse in the 1920s the League counted over 250 000 paying members spread to thirteen states and two Canadian provinces controlled North Dakota s state government and birthed new farmer labor alliances Yet today it is all but forgotten neglected even by scholars Michael J Lansing aims to change that Insurgent Democracy offers a new look at the Nonpartisan League and a new way to understand its rise and fall in the United States and Canada Lansing argues that rather than a spasm of populist rage that inevitably burned itself out the story of the League is in fact an instructive example of how popular movements can create lasting change Depicting the League as a transnational response to economic inequity Lansing not only resurrects its story of citizen activism but also allows us to see its potential to inform contemporary movements

Seeds of Exchange Maria Fedorova, 2025-08-15 Seeds of Exchange examines the US and Soviet exchange of agricultural knowledge and technology during the interwar period Maria Fedorova challenges the perception of the Soviet Union as a passive recipient of American technology and expertise She reveals the circular nature of this exchange through official government bureaus amid anxious farmers in crowded auditoriums in cramped cars across North Dakota and Montana and by train over the once fertile steppes of the Volga Amid the post World War I food insecurity Soviet and American agricultural experts relied on transnational networks bridging ideological differences As Soviets traveled across the US agricultural regions and Americans plowed steppes in the southern Urals and the lower Volga both groups believed that innovative solutions could be found beyond their own national borders Soviets were avidly interested in American technology and American agricultural experts perceived the Soviet Union to be an ideal setting for experimenting with and refining modern farm systems and organizational practices As Seeds of Exchange shows agricultural modernization was not the exclusive domain of Western countries

**Adapting to the Land** John F. Freeman, 2022-01-03 Adapting to the Land examines the extent to which Colorado agriculturists adapted to or stretched beyond the limits of land and water Historian John F Freeman and horticultural scientist Mark E Uchanski document the state s agricultural history and provide context for the shift away from traditional forms of agriculture to the use of synthetic fertilizers herbicides and pesticides and most recently to more values driven practices to support the burgeoning popularity of natural and organic foods This shift has resulted in the establishment of the global organic food processing and distribution industry which has roots in Colorado Ancestral Puebloans farmed and grazed within the limits of nature Early settlers adjusted their cultivation methods through trial and error while later agriculturists relied on research and technical advice from the Colorado Agricultural College As part of wartime mobilization the federal government prompted farmers to efficiently increase yields To meet the demand for food and fiber scientific and technical innovations led to the development of new plant cultivars and livestock breeds

advances in mechanization and widespread use of synthetic amendments Increasing concern over soil fertility and the loss of irrigation water to urbanization contributed to more changes Despite or perhaps because of what we see today along the Front Range Colorado may still have a chance to slow or even reverse its seemingly unrestrained growth creating a more vibrant earth friendly society in which agriculture plays an increasingly significant part Scientific discoveries and innovations in regenerative cultivation are clearing the path to a more sustainable future Adapting to the Land adds an ecological and horticultural perspective to historical interpretations of recurring agricultural issues in the state and tracks the concept of stewardship suggesting that spiritual beliefs continue to contribute to debates over acceptable agricultural practices and the effects of urbanization upon the land This book will be a key resource for students scholars and general readers interested in agricultural and Colorado history sustainability and rural sociology      *Nuclear Country* Catherine McNicol Stock, 2020-09-18 Militarization and nuclearization were the historical developments most essential to the creation of the rural New Right Both North Dakota and South Dakota have long been among the most reliably Republican states in the nation in the past century voters have only chosen two Democrats Franklin Roosevelt and Lyndon B Johnson and in 2016 both states preferred Donald Trump by over thirty points Yet in the decades before World War II the people of the Northern Plains were not universally politically conservative Instead many Dakotans including Republicans supported experiments in agrarian democracy that incorporated ideas from populism and progressivism to socialism and communism and fought against bigness in all its forms including bonanza farms out of state railroads corporations banks corrupt political parties and distant federal bureaucracies but also surprisingly the culture of militarism and the expansion of American military power abroad In *Nuclear Country* Catherine McNicol Stock explores the question of why between 1968 and 1992 most voters in the Dakotas abandoned their distinctive ideological heritage and came to embrace the conservatism of the New Right Stock focuses on how this transformation coincided with the coming of the military and national security states to the countryside via the placement of military bases and nuclear missile silos on the Northern Plains This militarization influenced regional political culture by reinforcing or re contextualizing long standing local ideas and practices particularly when the people of the plains found that they shared culturally conservative values with the military After adopting the first two planks of the New Right national defense and conservative social ideas Dakotans endorsed the third plank of New Right ideology fiscal conservatism Ultimately Stock contends that militarization and nuclearization were the historical developments most essential to the creation of the rural New Right throughout the United States and that their impact can best be seen in this often overlooked region s history      **Deep Roots, Broken Branches** Victoria Bynum, 2025-02-17 Best known for her award winning book *The Free State of Jones* Mississippi s Longest Civil War historian Victoria Bynum turns now to her own history in this multigenerational American saga spanning from 1840 to 1979 Through meticulous historical research personal letters diaries and the unpublished memoir of Mary Daniel Huckenpoehler the author s maternal grandmother Bynum examines five
