Asymmetric Killing Neil C. Renic, 2020-04-30 This book offers an engaging and historically informed account of the moral challenge of radically asymmetric violence warfare conducted by one party in the near complete absence of physical risk across the full scope of a conflict zone What role does physical risk and material threat play in the justifications for killing in war And crucially is there a point at which battlefield violence becomes so one directional as to undermine the moral basis for its use In order to answers these questions *Asymmetric Killing* delves into the morally contested terrain of the warrior ethos and Just War Tradition locating the historical and contemporary role of reciprocal risk within both This book also engages two historical episodes of battlefield asymmetry military sniping and manned aerial bombing Both modes of violence generated an imbalance of risk between opponents so profound as to call into question their permissibility These now resolved controversies will then be contrasted with the UAV exclusive violence of the United States robotic killing conducted in the absence of a significant military ground presence in conflict theatres such as Pakistan Yemen and Somalia As will be revealed the radical asymmetry of this latter case is distinct undermining reciprocal risk at the structural level of war Beyond its more resolvable tension with the warrior ethos UAV exclusive violence represents a fundamental challenge to the very coherence of the moral justifications for killing in war *Global Migration and Civic Education* James A.

Purvis, 2024-05 As the environmental justice movement slowly builds momentum Diane J

Purvis highlights the work of Indigenous peoples in Alaska's small rural villages who have faced incredible odds throughout history yet have built political clout fueled by vigorous common cause in defense of their homes and livelihood. Starting with the transition from Russian to American occupation of Alaska, Alaska Natives have battled with oil and gas corporations fought against U.S. plans to explode thermonuclear bombs on the edge of Native villages, litigated against political plans to flood Native homes, sought recompense for the Exxon Valdez oil spill disaster and struggled against the federal government's fishing restrictions that altered Native paths for subsistence. In *They Came but Could Not Conquer*, Purvis presents twelve environmental crises that occurred when isolated villages were threatened by a governmental monolith or big business. In each, Native peoples rallied together to protect their land, waters, resources and a way of life against the bulldozer of unwanted, often dangerous alterations labeled as progress. In this gripping narrative, Purvis shares the inspiring stories of those who possessed little influence over big business and regulations yet were able to protect their traditional lands and waterways anyway.
