Alfredo Saad-Filho, Ingar Solty, 2021-08-01 A history of the erosion of democracy across the globe Democracy is being destroyed This is a crisis that expresses itself in the rising authoritarianism visible in divisive and exclusionary politics populist political parties and movements increased distrust in fact based information and news and the withering accountability of state institutions Over the last four decades democracy has radically shifted to a market democracy in which all aspects of human non human and planetary life are commodified with corporations becoming more powerful than states and their citizens This is how neoliberal capitalism functions at a systemic level and if left unchecked is the greatest threat to democracy and a sustainable planet Volume six of the Democratic Marxism series focuses on how decades of neoliberal capitalism have eroded the global democratic project and how in the process authoritarian politics are gaining ground Scholars and activists from the political left focus on four country cases India Brazil South Africa and the United States of America in which the COVID 19 pandemic has fuelled and highlighted the pre existing crisis They interrogate issues of politics ecology state security media access to information and political parties and affirm the need to reclaim and re build an expansive and inclusive democracy Destroying Democracy is an invaluable resource for the general public activists scholars and students who are interested in understanding the threats to democracy and the rising tide of authoritarianism in the global south and the Military Spending and Global Security Jordi Calvo Rufanges, 2020-11-25 Global military expenditure reached an estimated 1 822 billion in 2018 and this book questions what that spending responds to and indeed what that entails in terms of global security The book draws from prior knowledge and research on military expenditure but introduces an all encompassing in depth and original analysis of military spending as a key and often overlooked factor of global instability delving into the present and future consequences of its perpetual growth as well as confronting the reasoning behind it The authors argue that increasing military expenditure is not the best response to the emergencies militarization itself has helped create They assert that militarization is paradoxically both a cause of and a response to the grave challenges our society is facing The book explains why people are not well served by nation states when they continuously seek to out compete one another in the size and destructive powers of their militaries It discusses the scope of military spending around the world while explaining how militarism is linked with conflict and security threats and how military spending further prevents us from adequately dealing with global environmental problems like climate change A must read for scholars researchers and students from a wide range of disciplines It will also find an audience among professionals from the third sector and activists working on issues related to peace security and militarism as well as social and climate justice
