**Car Tourism** Waldemar Cudny, 2017-07-05 This book examines the role of cars and the space connected with their production and presentation in tourism development It describes the role played by experiences and experience societies formed in the 20th c in the development of contemporary tourism including tourism related to cars The book explores the influence of experiencing unusual events such as car races car fairs visits to car industry museums or multifunctional spaces connected with producing and exhibiting cars e.g. Autostadt or Audi Forum on the development of a new type of tourism i.e. car tourism This kind of tourism is novel in two ways firstly it is a new phenomenon in science as so far it has not been thoroughly studied or described apart from various short articles Secondly this type of tourism has developed on a large scale only in recent years mainly due to the huge investments made by powerful European car manufacturers e.g. Autostadt Audi Forums Porsche Museum Lamborghini Museum etc The book presents cars and the spaces related to them as tourist assets sites events and as tourist products that satisfy tourists' needs Moreover it connects the issue of car tourism to the marketing strategies of large car manufacturers and discusses the theory of tourism space highlighting the main tourism spaces in which car tourism develops It presents multifunctional spaces factories adventure centres Autostadt in Wolfsburg museums car exhibitions and race tracks In the next chapter following an introduction to the problem of events the author describes events related to car tourism including races rallies driving schools and car fairs The book ends with a summarizing chapter which includes a model of the function of car tourism as a

separate type of tourism as well as a discussion presenting the main features advantages and disadvantages of car tourism in the context of the tourism space theory *EU Cross-Border Commercial Mediation* Anna Howard,2021-01-13 Despite the growing national and international regulatory framework to support cross border mediation the use of such mediation appears to remain stubbornly low This book focuses in particular on the European Union s EU s continued efforts to encourage the use of cross border mediation and examines why such efforts have had a limited impact It does so by drawing on rare and at times surprising detailed insights from in house counsel of multinational companies regarding their use of EU cross border commercial mediation By viewing mediation through the lens of disputants new and important findings regarding why disputants do and do not use cross border mediation have emerged While these findings are of primary relevance to EU policy and practice they have implications far beyond the EU context at a time of increasing international interest in cross border mediation The analysis of the insights provided by the disputants reveals for example the prominent role played by negotiation as a cross border dispute resolution process that negotiation is a key comparator for disputants when considering whether to use mediation how the EU s continued focus on understanding and presenting mediation as an alternative to litigation has resulted in measures which are insufficient to address fully the barriers to the use of mediation intriguing barriers to the use of mediation which arise from the association which disputants draw between mediation and negotiation how the relationship which disputants draw between mediation and negotiation paradoxically raises both opportunities for and obstacles to the increased use of mediation and what disputants need in order to increase their use of cross border mediation The qualitative nature by way of interviews of the research conducted for this book has enabled the identification of nuanced and novel findings regarding mediation s position and potential in cross border dispute resolution These findings together with a detailed examination of the EU Directive on Certain Aspects of Mediation in Civil and Commercial Matters and the EU s continued initiatives to foster the use of mediation form the foundation upon which this book s recommendations are built Changing the frame to view the use of mediation through the disputants perspective as this book does provides the opportunity for the EU to promote cross border mediation in a way which resonates more deeply with disputants and responds more fully to their concerns and needs This thought provoking book will be of interest not only to European and national bodies seeking to promote the use of mediation but clearly also to dispute resolution academics in house counsel and of course mediators and dispute resolution practitioners in general **NASA SP.** ,1990 *Migration in Southern Africa* Pragna Rugunanan,Nomkhosi Xulu-Gama,2022-05-30 This open access Regional Reader proposes new ways of theorizing migration in Southern Africa by arguing that traditional western forms of theorizing do not adequately fit the South South migration context It explores the existing definitions of a migrant with a view to conceptualise a definition which will speak to the complexities envisioning a more inclusive Southern African region The book investigates the various levels of migration moving from the local rural to urban and urban to rural to cross border migration middle class versus working

class migrant household livelihoods livelihoods procurement versus wage earning social capital networks and how they make meaning of their circumstances in a foreign space It also acknowledges the intertwined issues of gender and class as important in analyzing migration processes and the chapters feature both in varying dimensions As such the book provides a great resource for students academics and policy makers
