Pioneers in Public Health Jill Stewart, 2017-04-21 The public health movement involved numerous individuals who made the case for change and put new practices into place. However, despite a growing interest in how we understand history to inform current evidence-based practice, there is no book focusing on our progressive pioneers in public health and environmental health. This book seeks to fill that gap. It examines carefully selected public and environmental health pioneers who made a real difference to the UK's health, some with international influence. Many of these pioneers were criticised in their life times, yet they had the strength of character to know what they were doing was fundamentally right and persevered often against many odds. Including chapters on Thomas Fresh, John Snow, Duncan of Liverpool, Margaret McMillan, George Cadbury, Christopher Addison, Margery Spring Rice and others. This book will help readers place pioneers in a wider context and to make more sense of their academic and practitioner work today. How evidence and what was historically understood by it underpins modern day practice and how these visionary pioneers developed their ideas into practice, some not fully appreciated until after their own deaths. *Pioneers in Public Health* sets the tone for a renewed focus on research into evidence-based public and environmental health, which has become subject of growing international interest in recent years.

Sex Ed for Caring Schools Sharon Lamb, 2015-04-25 While arguments for and against teaching abstinence, the use of contraceptives and sexual identity are becoming more and more polarized, most people agree that students must learn to navigate an increasingly sexual world. *Sex Ed for Caring Schools* presents a curriculum that goes beyond the typical health education most students receive today. As part of a critical pedagogy movement that connects education to social justice enterprises, this book and the corresponding online curriculum encourage students to talk, write and think about the moral and relational issues underlying sex in society today. Addressing the real concerns of today's teens, this book includes lessons on pornography, prostitution, media objectification, religion and stereotypes.

Paradox Emilio J. Castilla, 2025-09-02 Meritocracy the idea that individuals should be rewarded based on their talent and hard work is one of the most widely celebrated ideals in education business and government It shapes how organizations recruit evaluate and promote promising a fair system where the best rise to the top But meritocracy has increasingly come under criticism for deepening inequality and reinforcing bias How did a once progressive ideal meant to level the playing field end up contributing to unfairness and privilege What happens when organizations treat merit as their guiding principle without questioning how it is defined or applied Most importantly how can today's leaders recognize and fix what's gone wrong In *The Meritocracy Paradox* Emilio J. Castilla offers timely new answers to these fundamental questions He analyzes the structure and culture of meritocracy inside organizations providing real world examples from hiring and merit based bonuses in companies to admissions decisions at elite universities to show how personal biases and social barriers can undermine the values and outcomes these systems are meant to uphold Castilla provides practical research backed frameworks to help organizations achieve true fairness and opportunity for all Drawing on successful data based interventions he presents concrete strategies for improving recruitment selection evaluation promotion and compensation processes revealing how motivated leaders can identify and correct shortcomings with cost effective targeted solutions that deliver proven results *The Meritocracy Paradox* is essential reading for anyone seeking to understand and improve the intersection of merit fairness and equal opportunity in organizations **Encyclopedia of Educational Theory and**

indicate something so valuable about human beings that they should be used to organize society Drawing on decades of experience as an educator author Wendy Zagray Warren unpacks the origins of this practice inviting us to probe the ideologies underlying testing procedures and score interpretation and to evaluate the rationale for using test scores as the sole markers for academic achievement From the beginning large scale tests have produced scores divided by race and class Initially these results aligned with the eugenic ideology of its creators Warren shows that while the rhetoric used to justify test based policy has changed the model used to produce test scores remains much the same Therefore so do the outcomes of test based policies which continue to reproduce and reinforce the existing social hierarchy of the United States The hope of equity lies in educators charting new paths and scholars around the world who are dreaming new educational paradigms into being Ultimately Warren invites policymakers educators and parents to explore the richness of possibility when education is designed around the belief that every child is worthy of the opportunity to thrive

Up from Slavery; an Unfinished Journey Archie Morris III D.P.A.,2019-03-21 For a period of eighty five years the M Street Dunbar High School was an academically elite all black public high school in Washington DC As far back as 1899 its students came in first in citywide tests given in both black and white schools Over this eighty five year span approximately 80 percent of M Street Dunbar s graduates went on to college even though most Americans white or black did not attend college at all Faculty and students were mutually respectful to one another and disruptions in the classroom were not tolerated Yet in this era of best practices this public high school has received virtually no attention in the literature or in policy considerations for inner city education The Dunbar High School today with its new building and athletic facilities is just another ghetto school with abysmal standards and low test score results despite the District of Columbia s record of having some of the country s highest levels of money spent per pupil The purpose of this study is to explore the history of a high school that was successful in teaching black children from low income families and to determine if the learning model employed there could be successful in a modern inner city public education environment
