and defined in the glossary **Fit to be Well** Alton L. Thygerson, Steven M. Thygerson, 2013 *Fit to Be Well Essential Concepts* offers simple workable approaches for being healthy and fit that can easily be integrated into a student's lifestyle and schedule. It encourages students to improve their eating habits and incorporate healthier foods into their diet, increase their level of physical activity, keep their body composition and weight at a healthy level, increase their self-esteem, and create a more positive self-image and reduce stress. Each chapter contains easy-to-follow guidelines to help students modify their lifestyle behaviors and make responsible decisions. A student lab manual is included at the back of the book at no additional cost. By adding self-assessments and related labs to each of the chapters, this text becomes an interactive guide to building and implementing a fitness program that will work with a student's individual needs and schedules.

Smart Cities Atlas Eleonora Riva Sanseverino, Raffaella Riva Sanseverino, Valentina Vaccaro, 2016-11-14 The book discusses the concept of the smart city and is based on a multi-service and multi-sectoral approach to urban planning, including various urban functions and the human capital of cities. The work is divided into three parts. The first is an introductory section which covers definitions, policies, and tools used at European level for the development and classification of a smart city. The second presents a selection of examples of Western and Eastern communities which experienced technologies and strategies that have made them smart. The third describes in detail the main three possible approaches: economical, technological, and social to the smart city concept, which are the focus areas of the holistic concept of smart city. The work provides a good overview of the concept of smart city and also offers a critical analysis of the various approaches to smart cities in order to provide tools to develop solutions that address the smart development of cities with an approach as multi-sectoral as possible. Its accessible language and several examples make the book easy to read and appealing to public administrators, students, planners, and researchers.

Journal of the American Dietetic Association, 1998 **Nutrient Requirements of Poultry** National Research Council, Board on Agriculture, Subcommittee on Poultry Nutrition, 1994-02-01 This classic reference for poultry nutrition has been updated for the first time since 1984. The chapter on general considerations concerning individual nutrients and water has been greatly expanded and includes for the first time equations for predicting the energy value of individual feed ingredients from their proximate composition. This volume includes the latest information on the nutrient requirements of meat and egg-type chickens, incorporating data on brown egg strains, turkeys, geese, ducks, pheasants, Japanese quail, and Bobwhite quail. This publication also contains new appendix tables that document in detail the scientific information used to derive the nutrient requirements appearing in the summary tables for each species of bird.
