*Dietary Bioactives and Bone Health* Taylor C. Wallace, 2018-04-20 This book is a printed edition of the Special Issue Dietary Bioactives and Bone Health that was published in *Nutrients* [Dietary Intake and Type 2 Diabetes](#) Omorogieva Ojo, 2019-12-05 The prevalence of diabetes is on the increase in the UK and worldwide partly due to changes in lifestyle which predispose individuals to overweight and obesity It is estimated that about 90% of the currently diagnosed adults have type 2 diabetes and based on the World Health Organisation WHO report about 422 million adults were living with diabetes in 2014 compared with 108 million in 1980 this condition caused about 1.5 million deaths in 2012 In the United States of America it is estimated that about 30.3 million adults are living with diabetes with a further 1.5 million new diabetes cases diagnosed every year representing an increasing prevalence of this condition Diabetes represents a major public health challenge despite advances in technology and the pharmaceutical industry These problems may be in the form of acute or long term complications Therefore in order to attenuate the problems of diabetes management strategies usually include lifestyle changes such as increased physical activity and dietary interventions Studies which evaluate the role of nutrition in the management of type 2 diabetes often involve human and animal models as these approaches enable us to have a broader and more in depth understanding of the condition In some cases diabetes may co exist with other conditions such as stroke and these may present unique challenges with regard to nutritional interventions This Special Issue aims to evaluate the risk factors associated with type 2 diabetes and the role of the diet in the management of people with this condition This evidence is drawn from both human and animal studies **Fit in 10: Slim & Strong--for Life!** Jenna Bergen
