School of Education, 1956. Bound volumes of the University of Michigan School of Education Staff bulletin. Teaching Outside the Box Mai Abdul Rahman, 2018-10-01. In its totality, this book explores subjects that are rarely available in primary literature publications and brings diverging fields together that are generally addressed separately in specialty journals. The book argues that past school failures are instructive. The author identifies the structural and emotional triggers that make it difficult for educators to overcome the social constructs that control the progress of Black students, reproduce inequities, subvert the socio-economic progress of the nation, and threaten the legitimacy of the U.S. public school system. One failure is informative: successive school failures are chock-full of must-avoid school policies and instructional practices. The book analyzes the lessons learned from a list of school-imposed policies that have molded and determined the academic progress of Black students. The author argues that much can be discerned from that which undermined the performance of schoolteachers and public school systems. The quantifiable outcomes of past school practices can better inform educators and future teachers and school leaders. The book carefully analyzes the organic evolution of educators' social constructs that regenerated inequities to reveal the road map for rebuilding genuinely inclusive and equitable public school systems that serve the interests of students and society. The book also provides in-depth analysis of various disciplines that identify the best methodologies to improve the teaching and learning of Black students, homeless students, and all other students. The book aims to offer a unique perspective by carefully unfolding the built-in school structures that obstruct the abilities of school administrators and teachers to bridge the student achievement gaps and meet

the objectives of consecutive school reform initiatives The author's distinctive approach stimulates the thinking of the entire field of education and challenges accepted propositions commonly assumed about African American students In short this book offers a perspective that is rarely shared or understood by educators and practitioners in the field of education The Right to Maim Jasbir K. Puar, 2017-10-11 In The Right to Maim Jasbir K Puar brings her pathbreaking work on the liberal state sexuality and biopolitics to bear on our understanding of disability Drawing on a stunning array of theoretical and methodological frameworks Puar uses the concept of debility bodily injury and social exclusion brought on by economic and political factors to disrupt the category of disability She shows how debility disability and capacity together constitute an assemblage that states use to control populations Puar's analysis culminates in an interrogation of Israel's policies toward Palestine in which she outlines how Israel brings Palestinians into biopolitical being by designating them available for injury Supplementing its right to kill with what Puar calls the right to maim the Israeli state relies on liberal frameworks of disability to obscure and enable the mass debilitation of Palestinian bodies Tracing disability's interaction with debility and capacity Puar offers a brilliant rethinking of Foucauldian biopolitics while showing how disability functions at the intersection of imperialism and racialized capital Machines of Youth Gary S. Cross, 2018-05-04 For American teenagers getting a driver's license has long been a watershed moment separating teens from their childish pasts as they accelerate toward the sweet sweet freedom of their futures With driver's license in hand teens are on the road to buying and driving and maybe even crashing their first car a machine which is home to many a teenage ritual being picked up for a first date parking at a scenic overlook or blasting the radio with a gaggle of friends in tow So important is this car ride into adulthood that automobile culture has become a stand in a shortcut to what millions of Americans remember about their coming of age Machines of Youth traces the rise and more recently the fall of car culture among American teens In this book Gary S Cross details how an automobile obsession drove teen peer culture from the 1920s to the 1980s seducing budding adults with privacy freedom mobility and spontaneity Cross shows how the automobile redefined relationships between parents and teenage children becoming a rite of passage producing new courtship rituals and fueling the growth of numerous car subcultures Yet for teenagers today the lure of the automobile as a transition to adulthood is in decline Tinkerers are now sidelined by the advent of digital engine technology and premolded body construction while the attention of teenagers has been captured by iPhones video games and other digital technology And adults have become less tolerant of teens on the road restricting both cruising and access to drivers licenses Cars are certainly not going out of style Cross acknowledges but how upcoming generations use them may be changing He finds that while vibrant enthusiasm for them lives on cars may no longer be at the center of how American youth define themselves But for generations of Americans the modern teen experience was inextricably linked to this particularly American icon *Getting the Most Bang from the Education Buck* Frederick M. Hess, Brandon L. Wright, 2020 The volume provides education leaders and policymakers with practical
