Motivation And Emotion Evolutionary Physiological Developmental And Social Perspectives:

Motivation and Emotion Denys DeCatanzaro, 1998 This unique book provides a comprehensive study of emotion within a modern evolutionary perspective Motivation and emotion are presented within an integrated approach that assumes biological and psychological causes including evolution neuroscience endocrinology human development and culture Motivation and Emotion Presents a wealth of modern evidence integrating neuroscience and endocrinology into the study of motivation and emotion The book provides a variety of photographs of facial expressions showing emotions from people of diverse cultures as well as nonhuman primates It also discusses modern interactive explanations for specific behaviors rather than dull historical perspectives For example human affect is explained as a response to social events and stress resulting in psychophysiological consequences An essential reference for any professional in sociology or psychology **Motivation** Roderick Wong, 2000-07-03 This book presents an analysis of motivated behaviour from a biological perspective

Subordination and Defeat Leon Sloman, Paul Gilbert, 2000-03-01 Most people now accept that human beings are the product of millions of years of mammalian evolution and more recently primate evolution This landmark book explores the implications of our evolutionary history for theories and therapies of depression In particular the focus is on how social conflict has shaped various behavioral and psychophysiological systems Special attention is given to the evolved mechanisms for dealing with social defeat and subordination in both animals and humans By linking human depression to the activation of ancient psychobiological programs for dealing with social conflict one is able to understand the function of depression within groups family systems and between individuals and begin to distinguish depressions that may have adaptive functions from those that are the result of maladaptive feedback systems Although many acknowledge the need for an integrated biopsychosocial theory of psychopathology there continue to be great divisions among social psychological and biological approaches Sloman and Gilbert have brought together leading scientists and clinicians representing different disciplines and schools to present a provocative new evolutionary model of depression This model illuminates old problems in new ways links a common disabling condition to evolved mental mechanisms and points to potential new approaches to prevention and intervention The book will be of compelling interest to all those who study or treat mood disorders **Lean Project**
