Abstract

Journal of Management Inquiry 22(1) 3-15

TABLE 1

1. The first step in the process is to identify the problem or goal. This involves understanding the current situation and what needs to be achieved.

2. Once the problem is identified, the next step is to gather information. This can be done through research, interviews, or data analysis.

3. After gathering information, the next step is to analyze the data. This involves looking for patterns, trends, and insights that can help inform the decision-making process.

4. The next step is to develop a plan or strategy. This involves determining the best course of action to achieve the goal, taking into account the available resources and potential risks.

5. Once a plan is developed, the next step is to implement it. This involves putting the plan into action and monitoring progress along the way.

6. Finally, the last step is to evaluate the results. This involves assessing the outcomes of the process and determining whether the goal was achieved.

1. **Identify the problem**: The first step is to identify the problem or issue that needs to be addressed. This involves understanding the current situation, the goals of the project, and the constraints that may be in place.
