Ziegler, Stephen R. Daines, P. Turner, Peter Turner, 1997      **Mesozoic Resource Potential in the Southern Permian Basin** B. Kilhams, P.A. Kukla, S. Mazur, T. McKie, H.F. Mijndieff, K. van Ojik, 2018-08-31 The Southern Permian Basin as its name suggests is a historical heartland for hydrocarbon production from the Palaeozoic Rotliegend interval However in this mature basin the Mesozoic presents further possibilities to offer resource security to NW Europe Such opportunities include increasing efficiency in the production of discovered hydrocarbons exploration for further hydrocarbons both conventional and unconventional and efficient exploration for and production of geothermal energy All these potential resources require a grounding in technically sound geoscience via traditional scientific observation and the application of new technologies to unlock their value The main aim of this volume is to bring together the work of academics and industry workers to consider cross border geoscience including contributions on Poland Germany The Netherlands the United Kingdom and adjacent areas The work presented intends to contribute to the development and discovery of further Mesozoic energy resources across the basin      United Kingdom Oil and Gas Fields G. Goffey, J.G. Gluyas, 2020-12-03 Geological Society Memoir 52 records the extraordinary 50 year journey that has led to the development of some 458 oil and gas fields on the UKCS It contains papers on almost 150 onshore and offshore fields in all of the UK's main petroliferous basins These papers range from look backs on some of the first developed gas fields in the Southern North Sea to papers on fields that have only just been brought into production or may still remain undeveloped and includes two candidate CO2 sequestration projects These papers are intended to provide a consistent summary of the exploration appraisal development and production history of each field leading to the current subsurface understanding which is described in greater detail As such the Memoir will be an enduring reference source for those exploring for developing producing hydrocarbons and sequestering CO2 on the UKCS in the coming decades It encapsulates the petroleum industry's deep subsurface knowledge accrued over more than 50 years of exploration and production      **Petroleum Geology of Northwest Europe** A.
