## **Online Peacemaking Extractive Industries Framework Corporate:**

**Peacemaking and the Extractive Industries** Natalie Ralph, 2017-11-22 Peacemaking and the Extractive Industries addresses a significant gap in research on the political and diplomatic role of multinational corporations in peace processes in intrastate conflict Corporate Peacemaking The author focuses on corporations in the oil and mining sectors supporting or participating in peace negotiations and mediation The chapters explore national level peace processes as well as those at community and global levels While the focus is on extractive companies the findings are valuable to companies from all industries looking at peace related processes This ground breaking book gives a comprehensive picture of how Corporate Peacemaking currently works how it can be developed and implemented and how it is likely to impact global governance and corporate culture in the future The book demonstrates that Corporate Peacemaking has the potential to be a powerful element in international governance and peace efforts and Ralph shows through the business case that companies as well as communities will benefit Ralph presents a new framework for Corporate Peace that will assist companies from all sectors in countries experiencing violent conflict in addition to instability human rights abuses and poor governance Based on rigorous academic research with practical case studies it is essential reading for practitioners academics policy makers and NGOs

*Business, Peacebuilding, and Regulation* Sean Molloy, 2024-08-26 This book examines the relationship between business based peacebuilding and the opportunities that emerge from the pluralisation of regulation The core message is notwithstanding the broad range of regulatory initiatives and actors that exist in conflict affected settings the state should assume responsibilities for defining the types of contribution that business can and ought to make to peace It also demonstrates how the state through different forms and methods of regulation is well placed to engage businesses to do so It is particularly concerned with the potential for regulation to help address what is identified as a state of optimistic uncertainty in the field of business and peacebuilding On one level there is a sense of optimism around the types of contributions that businesses can and often do make as agents for peace On another there are varying degrees of uncertainty surrounding the actual peacebuilding impacts of business activities how businesses are to understand the ways in which to make these contributions and why businesses would do so Regulation this book will argue can play an important role in bridging the chasm between optimism and uncertainty This book will be of interest to those engaged not only with business and peacebuilding but also business and human rights business and development and business and the environment Moreover this book is also of contemporary interest in other ways the aftermath of the Ukrainian conflict as an example will require a concerted effort to rebuild that society after war Private sector actors could be a powerful vehicle for reconstruction and development and this book examines how regulation can be used to facilitate businesses involvement in peacebuilding efforts

*Corporate Social Responsibility and Canada's Role in Africa's Extractive Sectors* Nathan Andrews, j. Andrew Grant, 2019-12-12 Africa's natural resource sectors are experiencing unprecedented levels of foreign investment and

production. Hailed as a means of reducing poverty and reliance on foreign aid, the role of foreign corporations in Africa's extractive sector is not well understood and important questions remain about the impact of such activities on people and on the environment. With reference to global governance initiatives aimed at promoting ethical business practices, this volume offers a timely examination of Canada-Africa relations and natural resource governance. Few Canadians realize how significant a role their country plays in investing in Africa's natural resource sector. The editors and contributors consider the interplay between public opinion, corporate social responsibility, and debates about the extraction and trade of Africa's natural resources.

**Governance, Natural Resources and Post-Conflict Peacebuilding** Carl Bruch, Carroll Muffett, Sandra Nichols, 2016-04-07

When the guns are silenced, those who have survived armed conflict need food, water, shelter, the means to earn a living, and the promise of safety and a return to civil order. Meeting these needs while sustaining peace requires more than simply having governmental structures in place; it requires good governance. Natural resources are essential to sustaining people and peace in post-conflict countries, but governance failures often jeopardize such efforts. This book examines the theory, practice, and often surprising realities of post-conflict governance, natural resource management, and peacebuilding in fifty conflict-affected countries and territories. It includes thirty-nine chapters written by more than seventy researchers, diplomats, military personnel, and practitioners from governmental, intergovernmental, and nongovernmental organizations. The book highlights the mutually reinforcing relationship between natural resource management and good governance. Natural resource management is crucial to rebuilding governance and the rule of law, combating corruption, improving transparency and accountability, engaging disenfranchised populations, and building confidence after conflict. At the same time, good governance is essential for ensuring that natural resource management can meet immediate needs for post-conflict stability and development while simultaneously laying the foundation for a sustainable peace. Drawing on analyses of the close relationship between governance and natural resource management, the book explores lessons from past conflicts and ongoing reconstruction efforts, illustrating how those lessons may be applied to the formulation and implementation of more effective governance initiatives and presenting an emerging theoretical and practical framework for policy makers, researchers, practitioners, and students.

**Governance, Natural Resources and Post-Conflict Peacebuilding** is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses with contributions from practitioners, policy makers, and researchers. Other books in this series address high-value resources, land, water, livelihoods, and assessing and restoring natural resources.

**Sustainable Development** Jason Miklian, Rina Alluri, John Elias Katsos, 2019-05-29 The intersection of business peace and sustainable development is becoming an increasingly powerful space and is already beginning to show the capability to drive major global change This book deciphers how different forms of corporate engagement in the pursuit of peace and development have different impacts and outcomes It looks specifically at how the private sector can better deliver peace contributions in fragile violent and conflict settings and then at the deeper consequences of this agenda upon businesses governments international institutions and not least the local communities that are presumed to be the beneficiaries of such

actions It is the first book to compile the state of the field in one place and is therefore an essential guide for students researchers policy makers and practitioners on the role of business in peace Without cross disciplinary engagement it is hard to identify where the cutting edge truly lies and how to take the topic forward in a more systematic manner This edited book brings together thought leaders in the field and pulls disparate strands together from business ethics management international relations peace and conflict studies in order to better understand how businesses can contribute to peacebuilding and sustainable development Before businesses take a deeper role in the most complicated and risky elements of sustainable development we need to be able to better explain what works why it works and what effective business efforts for peace and development mean for the multilateral institutional frameworks This book does just that **Mountain**

**International Organizations Hate Politics** Marieke Louis,Lucile Maertens,2021-04-05 Building on the concept of depoliticization this book provides a first systematic analysis of International Organizations IO apolitical claims It shows that depoliticization sustains IO everyday activities while allowing them to remain engaged in politics even when they pretend not to Delving into the inner dynamics of global governance this book develops an analytical framework on why IOs hate politics by bringing together practices and logics of depoliticization in a wide variety of historical geographic and organizational contexts With multiple case studies in the fields of labor rights and economic regulation environmental protection development and humanitarian aid peacekeeping among others this book shows that depoliticization is enacted in a series of

overlapping sometimes mundane practices resulting from the complex interaction between professional habits organizational cultures and individual tactics By approaching the consequences of these practices in terms of logics the book addresses the instrumental dimension of depoliticization without assuming that IO actors necessarily intend to depoliticize their action or global problems For IO scholars and students this book sheds new light on IO politics by clarifying one often taken for granted dimension of their everyday activities precisely that of depoliticization It will also be of interest to other researchers working in the fields of political science international relations international political sociology international political economy international public administration history law sociology anthropology and geography as well as IO practitioners

*Conflict-Sensitive Conservation* Carl Bruch, Geeta Batra, Anupam Anand, Shehla Chowdhury, Sierra Killian, 2023-08-10 This book provides an empirically formulated foundation for conflict sensitive conservation a field in which the existing literature relies primarily on anecdotal evidence Seeking to better understand the impact of conflict on the implementation and outcomes of environmental projects the Global Environment Facility GEF Independent Evaluation Office and the Environmental Law Institute undertook an evaluation of GEF support to fragile and conflict affected contexts Following a qualitative and quantitative analysis of documents from more than 4 000 projects the research team discovered a statistically

significant negative correlation between a country's Fragile States Index score and the implementation quality of environmental projects in that country. In this book the evaluation and research team explain these groundbreaking findings in detail highlighting seven key case studies: Afghanistan, Albertine Rift, Balkans, Cambodia, Colombia, Lebanon, and Mali. Drawing upon additional research and interviews with GEF project implementation staff, the volume illustrates the pathways through which conflict and fragility frequently impact environmental projects. It also examines how practitioners and sponsoring institutions can plan and implement their projects to avoid or mitigate these issues and find opportunities to promote peacebuilding through their environmental interventions. Examining data from 164 countries and territories, this innovative book will be of great interest to students and scholars of environmental management, conservation, international development, and the fast-growing field of environmental peacebuilding. It will also be a great resource for practitioners working in these important fields. *Oil, Profits, and Peace* Jill Shankleman, 2006. An evenhanded and insightful picture of the obstacles, fiscal incentives, and growing potential for Western oil companies to ameliorate or even prevent conflict in the areas where they operate.

*Peace in Digital International Relations* Oliver P. Richmond, Gëzim Visoka, Ioannis Tellidis, 2023-04-06. The international architecture of peacebuilding and statebuilding is currently responding to a shift from analogue to digital approaches in international relations. This is affecting conflict management, intervention, peacebuilding, and the all-important role of civil society. This Element analyses the potential that these new digital forms of international relations offer for the reform of peace praxis, namely the enhancement of critical agency across networks and scales, the expansion of claims for rights, and the mitigation of obstacles posed by sovereignty, locality, and territoriality. The Element also addresses the parallel limitations of digital technologies in terms of political emancipation related to subaltern claims, the risk of co-optation by historical and analogue power structures, institutions, and actors. We conclude that though aspects of emerging digital approaches to making peace are promising, they cannot yet bypass or resolve older analogue conflict dynamics revolving around power relations, territorialism, and state formation.
