

Hands-on Activities from Jefferson Lab's BLAST Program

Oobleck

Background:

The term "Oobleck" is derived from the book *Bartholomew and the Oobleck* by Dr. Seuss. Experimenting with Oobleck is much more than having fun with a weird substance. As students participate in this activity, they will develop important skills in scientific observation. Scientists at Jefferson Lab use a similar process to investigate quarks in the nucleus of the atom.

Objectives:

In this activity students will:

- work in groups
- follow a recipe to make Oobleck
- measure the proper amounts of each ingredient
- use all of their senses, except taste, to discover as many properties of Oobleck as they can
- record their observations on the [Oobleck Investigation Sheet](#)
- classify each property they find as being a property shared by solids, liquids or gases
- classify Oobleck as either a solid, liquid or gas

Minimum Materials Needed for Each Student Group:

- 1 Ziploc sandwich bag
- 1 tablespoon
- 1 teaspoon
- 30 milliliters (2 tablespoons) of a glue-water solution
- 10 milliliters (2 teaspoons) of a borax-water solution
- 2 drops of food coloring

Optional Materials:

- Newspapers to cover the desks
- Small bowls to hold the two solutions
- Containers to serve water solution
