Miller, 2010-05-17 The history is fascinating as are the insights into the personalities of these great thinkers New Scientist Is there a number at the root of the universe A primal number that everything in the world hinges on This question exercised many great minds of the twentieth century among them the groundbreaking physicist Wolfgang Pauli and the famous psychoanalyst Carl Jung Their obsession with the power of certain numbers including 137 which describes the atom's fine structure constant and has great Kabbalistic significance led them to develop an unlikely friendship and to embark on a joint mystical quest reaching deep into medieval alchemy dream interpretation and the Chinese Book of Changes 137 explores the profound intersection of modern science with the occult but above all it is the tale of an extraordinary fruitful friendship between two of the greatest thinkers of our times Originally published in hardcover as *Deciphering the Cosmic Number*

Styles of Thinking Hub Zwart, 2021-06-30 The way we experience investigate and interact with reality changes drastically in the course of history Do such changes occur gradually or can we pinpoint radical turns besides periods of relative stability Building on Oswald Spengler we zoom in on three styles in particular namely Apollonian Magian and Faustian thinking guided by grounding ideas which can be summarised as follows Act in accordance with nature Prepare yourself for the imminent dawn and Existence equals will to power Finally we reach the present How to characterise the new era we entered around the year 2000 *Infinite Reach* John E.

Biersdorf, 2016-06-16 *Infinite Reach* Spirituality in a Scientific World connects and integrates the great spiritual insights with science and mathematics for the increasing numbers of Americans who consider themselves spiritual but not religious or spiritual and religious or none of the above and who no longer find traditional religious doctrines and institutions credible or matching their experience In nontechnical language it precisely and clearly traces how current brain mind research informs and enhances inner spiritual and religious experience and how scientific cosmology confirms spiritual intuitions From hunting gathering prehistory through city states empires and the great religions scientific methods advance exponentially faster into the future while the great spiritual insights have never been surpassed though often ignored or denied But

scientific knowing and spiritual knowing share infinite reach Brain mind research contributes to understanding and living meditation and spiritual practices in silence ritual and vision Modern physics and mathematics demonstrate how humans observe and participate in the actual evolution of the universe Fractals in chaos theory are spiritual images of ultimate reality In creating loving and undifferentiated presence we find our own unique voice in the mystery of ultimate reality touching down here and now in the specifics of this present moment Black Storm Joseph A. enigmatic ancient Egyptians can teach us about our own modern psyches and the pursuit of a meaningful life Hayen examines the ancient Egyptians possession of a concept contemporary academics have labeled consciousness of the heart an innate knowledge of the entirety of the universe While all human beings possess this consciousness of the heart our modern culture has largely lost the ability to tap into this inborn knowledge By examining the material accomplishments of ancient Egypt and how their seemingly deeper awareness of their inner world created a harmonious outer world we can begin to understand how modern psychotherapy through a Jungian perspective could be instrumental in achieving a more profound and meaningful personal experience of life Ancient Egypt and Modern Psychotherapy will be insightful reading for analytical psychologists in practice and in training Jungian psychotherapists and psychologists and academics and students of Jungian and post Jungian studies and ancient spirituality

Einstein's Genius Club Burton Feldman, 2011-09-01 As World War II wound down and it became increasingly clear that the Allies would emerge victorious Albert Einstein invited three close friends all titans of contemporary science and philosophy to his home at 112 Mercer Street in Princeton New Jersey to discuss what they loved best science and philosophy His guests were the legendary philosopher and pacifist Bertrand Russell the boy wonder of quantum physics Wolfgang Pauli and the brilliant logician Kurt G del Their casual meetings took place far from the horrific battlefields of the war and the then secret lair of experimental atomic physicists in Los Alamos New Mexico Using these historic meetings as his launching pad Feldman sketches the lives and contributions of the four friends colleagues and rivals especially Einstein innately self confident but frustrated in his attempt to come up with a unified theory and the aristocratic but self doubting Lord Russell Masterfully researched this book accessibly illuminates the feelings of these notable men about the world of science that was then beginning to pass them by and about the dawning atomic age that terrified them all

Amazing Grace of Quantum Physics Dillard W. Faries, 2017-11-07 Science and faith have had a long intertwined history The relationship has run the gamut from a total disconnect to an adversarial battleground where proponents of each claim total victory However if God created the physical world and remains active in the physical world we cannot ignore the interaction nor can we assume or expect a world of conflict While nineteenth century physics brought classical physics which quite reasonably divorced God and nature to a culmination twentieth century physics especially quantum physics has opened a new realm of possible interactions Even though one can reasonably say that no one understands quantum physics the fruits of the discipline overflow the cornucopia People of faith can share the feast and people of science are welcome at the table of faith

Collective Consciousness and Gender Alexandra Walker,2018-08-22 This book explores collective consciousness and how it is applied to the pursuit of gender justice in international law It discusses how the collective mode of behaviour and identity can lead to unconscious role playing based on the social norms expectations or archetypes of a group Alexandra Walker contends that throughout history men have been constructed as archetypal dominators and women as victims In casting women in this way we have downplayed their pre existing innate capacities for strength leadership and power In casting men as archetypal dominators we have downplayed their capacities for nurturing care and empathy The author investigates the widespread implications of this unconscious role playing arguing that even in countries in which women have many of the same legal rights as men gender justice and equality have been too simplistically framed as feminism and women s rights and that giving women the rights of men has not created gender balance This book highlights the masculine and

feminine traits belonging to all individuals and calls on international law to reflect this gender continuum *Spontaneous Painting* Susan Bello Ph.D.,2013-06-04 The new scientific paradigm based on the primacy of consciousness is here and the question in everybodys mind is how we access quantum consciousness and its causal power The artist author Susan Bello gives us a wonderful and powerful method spontaneous painting It is really very enjoyable and is a suitable vehicle for all people who are young at heart and like to play I recommend this method and this book very highly Amit Goswami quantum physicist and author of *The Self Aware Universe* *God Is Not Dead* and the upcoming *Quantum Creativity Think Quantum Be Creative* This is a truly brilliant and significant book merits joyful reading and treasuring Prof Dr Ervin Lszl Founder of Club Budapest Chancellor Designate of the newly formed GlobalShift University author of over 80 books including *The Creative Cosmos* *A Unified Science of Matter Life and Mind* The symbol is a universal resource which nature has bestowed upon us to evolve human consciousness It embodies energy of pure potentiality that lives in a dormant state in our Unconscious The process of Spontaneous Painting unleashes this powerful life force within Each persons unique potential Authentic and Higher Self life direction and Innate Authentic Multiple Intelligences flow forth through the brushstroke onto the paper No artistic training is necessary Once our symbols are expressed a transformative process is activated that initiates behavioral change Our symbols begin to direct us from within Our Authentic Self is a core energetic configuration that is like no one elses Each one of us is a unique individual with special gifts passions and a life purpose Our Higher Self embodies such states as love inner wisdom centeredness joy and compassion The key to creating a new paradigm is to develop these constructive expressions of consciousness in each planetary citizen for personal and social transformation Symbols express in the form of images Why are images used to transmit this energy Images are the primal universal language of humankind The fact that the ability to make images has been with us since the beginning of time suggests it may possess an important survival function of which we are not yet aware The name The I am I TM Method of Spontaneous Painting was chosen to honor our Innate Authentic Multiple Intelligences hence the acronym I am ITM These intelligences include our emotional creative intuitive imaginative symbolic spiritual visual and kinesthetic ways of knowing All of these intelligences are developed during The I am I Method Although we are born with these intelligences and the ability to paint spontaneously education has focused mainly on the rational intellect and on how to paint the external and not the internal landscape a vast resource of inner wisdom Part One of this book is an autobiographical summary of the experiences that led the author to develop The I am ITM Method of Spontaneous Painting The paintings in Part Two document her empirical experimentation with Spontaneous Painting sourced from the authority of her soul Part Three is an academic exploration and a theoretical and scholarly documentation of the psychological and quantum states of mind that can be experienced during the Spontaneous Painting Process *American Jews with Czechoslovak Roots* Miloslav Rechcigl Jr.,2018-06-19 This is a pioneering comprehensive bibliography of existing publications relating to American Jews with ancestry in the former Czechoslovakia
