Flaherty,Thomas G. Matyók,Sean Byrne,Hamdesa Tusu,2015-10-16 The twenty first century has brought with it a shift from the notion of human security being located in secure national borders to the need to secure the safety freedom and dignity of all Despite efforts to equalize women s status in the world evidenced by changes in many international projects requiring a gender focus women and men experience most of the world in very different ways according to gender Further the reality is that humans who do not all fall neatly into one of these categories male or female often find their lives further challenged In the 1980s Peace and Conflict Studies first began to acknowledge and study the different experiences males and females have during war and peace Since then there have been books about women and war women working at grassroots levels to build peace women and transitional justice women and peace education and women s views of human security All of these works have contributed to the

discourse of our changing world This book brings together some of those themes and voices and adds more with the final product being more than the sum of its parts We add to the conversation a book that considers foundational fundamental issues that span from the interpersonal to the global Many of the chapters describe empirical research completed with author and community shared here for the first time Part One is a collection of case studies documenting challenges and responses to peacebuilding by women from various parts of the world Part Two focuses on Peace and Conflict Studies PACS as a discipline examining not only what is but also what should be taught This section critiques today's efforts at teaching Peace and Conflict Studies and provides suggestions of how this important work might be shared in more open and equitable ways Part Three enters territory found even less in the PACS literature In this section our authors confront patriarchy engage in a discussion about the contribution queer theory makes to PACS and tussle with the notion of inclusivity with considerations of both gender and disability It then ends with a discussion about the contribution feminist methodologies make to PACS

Multiparty Mediation in Violent Conflict Tetsuro Iji, 2019-09-11 This book presents a conceptual and empirical analysis of the UN led multiparty mediation in the Tajikistan conflict Multiparty mediation has been a significant research topic of international conflict management since the 1990s but in depth case studies on the peacemaking dynamics of violent conflicts are rare particularly in regard to third party roles This volume addresses that gap in the literature by examining the multiparty mediation of the Tajikistan conflict a largely forgotten but notably successful case of UN orchestrated peacemaking in the post Cold War era It argues that several interrelated factors contributed to the success of the Tajik multiparty mediation Russia Iran and other major interveners shared a common interest and reached a broad consensus on the terms of settlement the UN was widely accepted as a lead coordinator by other mediators and succeeded in constructively engaging with them as a consequence there arose positive interconnections between different third party roles The book presents an analytical framework for understanding the complex interplay of these factors not only to evaluate the Tajik case but also to help clarify policy implications for multiparty mediation in other cases of violent conflict particularly civil wars This book will be of much interest to students of conflict resolution civil wars international mediation the UN Central Asian politics and International Relations

The Oxford Handbook of Political

Psychology Leonie Huddy, David O. Sears, Jack S. Levy, 2013-08-01 Political psychology applies what is known about human psychology to the study of politics. It examines how people reach political decisions on topics such as voting, party identification and political attitudes as well as how leaders mediate political conflicts and make foreign policy decisions. The Oxford Handbook of Political Psychology gathers together a distinguished group of scholars from around the world to shed light on these vital questions. Focusing first on political psychology at the individual level (attitudes, values, decision making, ideology, personality) and then moving to the collective group (identity, mass mobilization, political violence), this fully interdisciplinary volume covers models of the mass public and political elites and addresses both domestic issues and foreign policy. Now with new material providing an up to date account of cutting edge research within both psychology and political science, this is an essential reference for scholars and students interested in the intersection of the two fields.

Track Two Diplomacy in Theory and Practice Peter Jones, 2015-09-02 Jones provides a nuanced perspective on both the promise and limits of this unheralded form of unofficial diplomacy. Stephen J. Del Rosso, Director, International Peace and Security, Carnegie Corporation of New York. Track Two diplomacy consists of informal dialogues among actors such as academics, religious leaders, retired senior officials and NGO officials that can bring new ideas and new relationships to the official process of diplomacy. Sadly, those involved in official diplomacy often have little understanding of and appreciation for the complex and nuanced role that Track Two can play or for its limitations. And many Track Two practitioners are often unaware of the realities and pressures of the policy and diplomatic worlds and not particularly adept at framing their efforts to make them accessible to hard pressed officials. At the same time, those interested in the academic study of Track Two sometimes fail to understand the realities faced by either set of practitioners. A need therefore exists for a work to bridge the divides between these constituencies and between the different types of Track Two practice. This book crosses disciplines and traditions in order to do just that. It explores the various dimensions and guises of Track Two, the theory and practice of how they work and how both practitioners and academics could more profitably assess Track Two. Overall, it provides a comprehensive picture of the range of activities pursued under this title to provoke new thinking about how these activities relate to each other to official diplomacy and to academe. This book will be a classic that defines the field of Track Two diplomacy as an exemplary work.
