EU Competition Law and Pharmaceuticals Wolf Sauter, Marcel Canoy, Jotte Mulder, 2022-11-15 This timely book discusses the application of the EU competition rules to pharmaceuticals covering the prohibitions on anticompetitive agreements and abuse of dominance and merger control It carefully considers the balance between competition and innovation as well as between competition and regulation and concludes that competition and regulation are not alternatives but complementary and that novel ways of taking into account risk and real innovation through competition assessments have been developed

Market Definition in EU Competition Law Miguel Sousa Ferro, 2019 The maintenance of a fair competitive market among member states is critical to the functioning of the EU economy In this book the first comprehensive unifying view of market definition Miguel Ferro adeptly explores the different economic legal issues that arise in EU competition law

*Resale Price Maintenance and Vertical Territorial Restrictions* Barbora Jedlicková, 2016-03-25 Theoretical discussions among competition lawyers and economists on the approach to Resale price Maintenance RPM and Vertical territorial Restrictions VTR have often caused controversy However commentators agree that there is a lack of comprehensive study surrounding the topic This book explores these two forms of anticompetitive conduct from legal historical economical and theoretical points of view focusing on the EU and US experiences The author expertly goes beyond the current legal practice to explain among other things what approach should apply to RPM and VTR and why RPM and VTR are introduced in situations where procompetitive theories would not make economic sense or do not apply in practice The book takes account of economic values such as efficiency and welfare as well as other values such as freedom

fairness and free competition Scholars and students of law will find the book's depth of legal economic and historical analysis to be a rich contribution to the scholarship This book will also be of use to EU and US practitioners and enforcers dealing with RPM and VTR cases      **Routledge Handbook of Marxian Economics** David M. Brennan, David

Kristjansson-Gural, Catherine P. Mulder, Erik K. Olsen, 2017-03-16 Most developed economies are characterized by high levels of inequality and an inability to provide stability or opportunity for many of their citizens Mainstream economics has proven to be of little assistance in addressing these systemic failures and this has led both scholars and students to seek alternatives One such alternative is provided by Marxian economics In recent decades the field has seen tremendous theoretical development and Marxian perspectives have begun to appear in public discourse in unprecedented ways This handbook contains thirty seven original essays from a wide range of leading international scholars recognized for their expertise in different areas of Marxian economics Its scope is broad ranging from contributions on familiar Marxist concepts such as value theory the labor process accumulation crisis and socialism to others not always associated with the Marxian canon like feminism ecology international migration and epistemology This breadth of coverage reflects the development of Marxian economic and social theory and encompasses both the history and the frontiers of current scholarship This handbook provides an extensive statement of the current shape and future direction of Marxian economics The Routledge Handbook of Marxian Economics is an invaluable resource for students researchers and policy makers seeking guidance in this field It is designed to serve both as a reference work and as a supplementary text for classroom use with applications for courses in economics sociology political science management anthropology development studies philosophy and history

**Neoliberalism and Race** Lars Cornelissen, 2025-10-14 Lars Cornelissen argues that the category of race constitutes an organizing principle of neoliberal ideology Using the methods of intellectual history and drawing on insights from critical race studies Cornelissen explores the various racial constructs that structure neoliberal ideology some of which are explicit while others are more coded Beginning in the interwar period and running through to recent developments Neoliberalism and Race shows that racial themes have always pervaded neoliberal thinking The book's key argument is that neoliberal thought is constitutively racialized its racial motifs cannot be extracted from neoliberalism without rendering it theoretically and politically incoherent The book aptly explores a wide variety of racial constructs through the structure of neoliberal ideology deconstructing the conceptualizations in the works of landmark thinkers such as Ludwig von Mises Friedrich Hayek Peter Bauer Thomas Sowell Charles Murray and others from the early twentieth century to the present In this original perhaps controversial critique Cornelissen asserts that neoliberal thinkers were not just the passive recipients of racial discourse but also directly impacted it      **Journal of a Dissenter** Chris Wright, 2025-01-20 This is a lengthy intellectual journal by a political radical that ranges over a variety of subjects such as Marxism capitalism history many schools of modern philosophy psychology economics and contemporary American politics It also includes quite a few personal passages

but I've kept those only because they express common experiences and youthful psychological tendencies. Its most useful content for students might be its many summaries of good historical and scientific scholarship especially in the journal's second half. Ultimately the document is a fairly comprehensive expression of a particular society as refracted through an inquisitive and critical mind from the ages of 15 to 44. Postcolonial Historical Materialism Filippo Menozzi, 2025-03-27 Through a reappraisal of the work of four major figures in critical theory Ernst Bloch Georg Lukács Theodor Adorno and Walter Benjamin Filippo Menozzi rethinks the tradition of critical theory in relation to pressing concerns in postcolonial studies. Revealing these authors' continued relevance to urgent issues in the 21st century from struggles against racism to social movements and the transmutations of global capitalism Menozzi reimagines them as central to an alternative genealogy of critical theory that moves beyond their European provenance and the limitations of Western Marxism. In doing so this book challenges more broadly the view of critical theory as steeped in Eurocentrism culturally conservative and politically defeatist. Contesting this in four chapters Postcolonial Historical Materialism inserts Adorno Lukács Bloch and Benjamin into key contemporary sites of militancy and debate. Engaging with a wide range of European and non-European sources Menozzi proposes a new concept of postcolonial historical materialism indicating how the heritage of critical theory can reopen global possibilities of utopia and revolution in a non-utopian age of global emergencies social unrest and the unfinished history of decolonisation. Imperialism and Capitalism, Volume I Dipak Basu, Victoria Miroshnik, 2020-08-17 This book examines the history of empire and its influence on capitalism. Taking inspiration from Vladimir Lenin's essay Imperialism the Highest Stage of Capitalism the thoughtful chapters explore how workers and resources in Africa Latin America and Asia were exploited by capitalist colonizers. Particular attention is given to the empires of Great Britain Russia Japan the Netherlands and the United States. This book aims to trace the historical development of capitalism and its reliance on colonialism and is relevant to those interested in economics development studies international relations and global politics.

**Colonialism in India** G. Krishnan-Kutty, 1985 Development and Diffusionism J. Dibia, 2015-12-04 This book deconstructs the neopatrimonial paradigm that has dominated analysis of Nigerian and African development. It shows that by denying agency to Nigerian societies and devaluing indigenous culture and local realities Eurocentric diffusionism played a significant role in the failure of development planning. **Church and Ethical Responsibility in the Midst of World Economy** Paul S. Chung, 2013-04-25 Magisterial in scope and scrupulous in its investigation and attribution of sources Church and Ethical Responsibility in the Midst of World Economy will take its place as an important document that contributes much in terms of prophetic praxis. It challenges those who are comfortably complacent and unwilling to be disturbed. **British Imperialism and Globalization, C. 1650-1960** Gareth Austin, 2022 Examining the domestic politics of imperial expansion these essays question the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy and The Great Divergence. This volume brings together leading global economic historians to honour

Patrick O'Brien's contribution to the establishment of global economic history as a coherent and respected field in the academy. Inspired by O'Brien's seminal work on the British Industrial Revolution as a global phenomenon, these essays expand the role of the Industrial Revolution and British imperial leadership beyond the issue of hierarchy. The Great Divergence: The change from the protective Atlantic empire (1650-1850) to the free trade empire of the last half of the long nineteenth century is elaborated, as are the conscious efforts of the free trade empire to develop markets and market economies in Africa. British domestic politics associated with the change and the continuation to the recent politics of Brexit are fascinatingly narrated and documented, including the economic rationale for imperial expansion. In the first instance, the narrative continues to the crises of globalization caused by the world wars and the Great Depression, which forced the free trade British Empire to change course. Further, the effects of the crises and the imperial reaction on the East African colonies and on New Zealand and Australia are examined. Given current concerns about the environmental impact of economic activities, it is noteworthy that this volume includes the environmental impact of globalization in India caused by the free trade policy of the British free trade empire.

**Rich World, Poor World** Ali A. Allawi, 2024-04-23. A landmark history of the world economic order exploring how developing countries have fought to escape impoverishment. Over the past two decades, experiments in neoliberal economics have opened up a chasm of inequality between the Global South and the West. Development advice from richer nations has led to social upheaval, political unrest, environmental degradation, and even the creation of a new underclass. Brutal extremes of wealth and poverty are now commonplace. Ali A. Allawi traces the evolution of the world economic order from the late imperial era to the present day. Shedding light on continuing controversies, Allawi shows how the process of development has been hindered at every turn, from poor leadership and lost opportunities to widespread corruption. In doing so, he argues that the current neoliberal consensus is only the most recent of a series of failed policy imperatives. Covering issues in the Global South as well as failures in the West, this definitive account offers an impassioned and authoritative call for change.

*Late Capitalism* Ernest Mandel, 2024-07-30. Late Capitalism is the first major synthesis to have been produced by the contemporary revival of Marxist economics. It represents, in fact, the only systematic attempt so far ever made to combine the general theory of the laws of motion of the capitalist mode of production developed by Marx with the concrete history of capitalism in the twentieth century. A landmark in Marxist economic
