agencies worldwide sharing Adobe PDF files **Beginning Adobe AIR** Rich Tretola, 2010-01-26 If you're ready to take advantage of Adobe Integrated Runtime AIR to build desktop based Rich Internet Applications then this is the book for you After introducing you to AIR Adobe expert Rich Tretola discusses the different programming languages and tools you can use for development He presents multiple methods for storing data including within the file system and embedded database as well as storage on remote servers This guide is a perfect mix of tutorials and hands on coding and provides the resources you need to build AIR applications quickly **Administrative Notes**, 1999 **Machine Learning in Medicine - A Complete Overview** Ton J. Cleophas, Aeilko H. Zwinderman, 2020-03-03 Adequate health and health care is no longer possible without proper data supervision from modern machine learning methodologies like cluster models neural networks and other data mining methodologies The current book is the first publication of a complete overview of machine learning methodologies for the medical and health sector and it was written as a training companion and as a must read not only for physicians and students but also for any one involved in the process and progress of health and health care In this second edition the authors have removed the textual errors from the first edition Also the improved tables from the first edition have been replaced with the original tables from the software programs as applied This is because unlike the former the latter were without error and readers were better familiar with them The main purpose of the first edition was to provide stepwise analyses of the novel methods from data examples but background information and clinical relevance information may have been somewhat lacking Therefore each chapter now contains a section entitled Background Information Machine learning may be more informative and may provide better sensitivity of testing than traditional analytic methods may do In the second edition a place has been given for the use of machine learning not only to the analysis of observational clinical data but also to that of controlled clinical trials Unlike the first edition the second edition has drawings in full color providing a helpful extra dimension to the data analysis Several machine learning methodologies not yet covered in the first edition but increasingly important today have been included in this updated edition for example negative binomial and Poisson regressions sparse canonical analysis Firth's bias adjusted logistic analysis omics research eigenvalues and eigenvectors
