Book Handbook Biophilic City Planning Design:

Handbook of Biophilic City Planning & Design Timothy Beatley, 2016 This publication offers practical advice and inspiration for ensuring that nature in the city is more than infrastructure that it also promotes well being and creates an emotional connection to the earth among urban residents Divided into six parts the Handbook begins by introducing key ideas literature and theory about biophilic urbanism Chapters highlight urban biophilic innovations in more than a dozen global cities The final part concludes with lessons on how to advance an agenda for urban biophilia and an extensive list of resources Publisher

The Emergence of Biophilic Design Jana Söderlund, 2019-10-18 This book addresses the emergence of biophilic design a form of design that looks at people's intrinsic connection with nature There is no denying that biophilic design is rapidly expanding globally as an effective response to pressing issues in urban areas and built environments From being a term few had heard of in 2012 when the author's research began to one that is currently trending in a broad range of disciplines the story of its emergence has never been properly told The story of the emergence of biophilic design is the story of a social movement and how a gathering of people with a common interest and passion can spark a global trend The book and the stories within are not only engaging but also informative and educational offering readers an in depth understanding of what biophilic design is all about and how to promote its implementation in their own built environment Hopefully they will inspire people to act to campaign and to implement initiatives in their urban environment with the confidence that they are capable of making a difference The author spent three years researching the emergence of biophilic design and why and how it was driven by certain people who championed the concept Part of the author's research involved a three month tour of ten North American cities during which she interviewed 26 key players These people ranged from community leaders landscape architects and academics to the CEOs of NGOs and government leaders The result is a collection of stories that illustrate the evolution of biophilic design and how it was frequently born from a passion for belief in and love of nature as well as a response to an urban crisis

The Routledge Companion to the Philosophy of Architectural Reconstruction Zoltán Somhegyi, Lisa Giombini, 2024-05-30 This companion investigates the philosophical and theoretical foundations determining the conditions of possibility and the limits that make the conservation readaptation and transformation of past buildings legitimate operations As increasing ecological and economic challenges question opportunities for new construction the process of restoring transforming and readapting buildings for new or continued use is becoming an essential part of architectural practice At the same time the role of building conservation is changing from mere material preservation to being part of a broader strategy for social regeneration eco awareness and inclusive urban planning Chapters of this volume explore the complex set of considerations that inform decisions to merely preserve accurately restore or variously reuse a building They also look at the broader philosophical concerns such as ethical and aesthetic values combined with ideas of heritage history and collective identity Case studies on reconstruction after war gentrification the restoration of ancient

edifices reconstruction following the effects of climate change and the use of technology solutions among many others make this a timely and urgent volume Adopting a broad transcultural perspective with contributions from five continents the volume combines theoretical approaches with more practical case study based investigations and will be of great interest to upper level students and academics working in the fields of architecture conservation urban design aesthetics and heritage management

Unlocking Sustainable Cities Paul Chatterton, 2018-11-20 This book is a manifesto for real urban change Today our urban areas are held back by corporate greed loss of public space and rising inequality This book highlights how cities are locked into unsustainable and damaging practices and how exciting new routes can be unlocked for real change Across the world city innovators are putting real sustainability into practice from transforming abandoned public spaces and setting up community co operatives to rewilding urban nature and powering up civic energy Paul Chatterton explores the power of these city experiments that harness the creative power of the collective focusing on five themes compassion imagination experimentation co production and transformation and four city systems mobility energy community and nature Imagining radical alternatives such as car free post carbon common and bio cities this is a toolkit for unlocking real urban change

The Urban Forest in the Age of Urbanisation Samaneh Sadat Nickain, 2022-09-01 The Urban Forest in the Age of Urbanization seeks to reflect on the connotation of urban forestry in line with related emergent holistic theories Today much of the planet is urbanised and planners debate Planetary Urbanization economists discuss The Global City ecologists describe the planet s biodiversity hotspots and climate scientists warn of a global crisis We might think therefore that focusing on forestation approaches at the Urban and peri urban edge might be reductionist However if the city is everywhere and everything is a city if the urbanised world now is a chain of metropolitan areas connected by places and corridors of communication then what is not urban And above all which forests are not urban forests Starting from the dualism between city and forest and its evolution towards holism the book seeks to create a framework of dialectical approaches The case studies included analyse a wide range of urbanisation processes to review the practical approaches of urban forestry in line with the global crisis of the era of globalisation when climate change population growth implosions and explosions of urbanisation lack of arable land and food are unavoidable

Regenerating Cities Maria Elena Zingoni de Baro, 2022-01-18 This book sets out the discussion on how cities can contribute solutions to some of the challenges the urbanised world is facing such as the pressure of growing populations mitigation of effects of and adaptation to globally changing environmental climate and public health conditions Presenting a detailed explanation of the causes behind the current state of modern cities the book advocates for a paradigm shift to improve the quality of life of ever increasing urban inhabitants whilst nourishing the natural systems that sustain human and non human life in the planet Recognising the precious role that nature plays in the functioning of cities it delves into the study of biophilic design and regenerative development The book argues that these social ecological design approaches can act as catalysts to develop conditions in urban settings that are beneficial for natural

and human systems to thrive and flourish both in ecosystem services and social cultural systems This is particularly relevant for the design of new quality precincts or the regeneration of degraded urban spaces to promote health wellbeing and urban resilience A framework is proposed to guide the process of thinking about designing and building healthier more liveable and resilient urban environments that raise the quality of life in cities The method can be used by researchers practitioners urban designers urban planners architects and landscape architects interested in developing their work within a social ecological perspective It can also be used by local governments and agencies to underpin policy making and by educational institutions to prepare graduates with necessary skills to respond to current and future built environment challenges **Portland's**

Good Life R. Bruce Stephenson, 2021-03-10 Iconic urbanist Lewis Mumford stressed the role of a well constructed city in the development of the good life championing pedestrian scaled sustainable cities In Portland's Good Life R Bruce Stephenson examines how Portland the one city in America that adopted Mumford's vision became a model city for living the good life Stephenson traces Portland's success to its grass roots governing system its housing and climate protection initiatives and most of all its citizens devoted to the public good all of which have resulted in the construction of a city that honors the humanity of its people *Systemic Design* Peter Jones, Kyoichi Kijima, 2019-01-23 This book presents emerging work in the co evolving fields of design led systemics referred to as systemic design to distinguish it from the engineering and hard science epistemologies of system design or systems engineering There are significant societal forces and organizational demands impelling the requirement for better means of change through integrated design practices of systems and services Here we call on advanced design to lead programs of strategic scale and higher complexity e g social policy healthcare education urbanization while adapting systems thinking methods creatively pushing the boundaries beyond the popular modes of systems dynamics and soft systems Systemic design is distinguished by its scale social complexity and integration it is concerned with higher order systems that entail multiple subsystems By integrating systems thinking and its methods systemic design brings human centred design to complex multi stakeholder service systems As designers engage with ever more complex problem areas it is necessary to draw on a basis other than individual creativity and contemporary design thinking methods Systems theories can co evolve with a new school of design theory to resolve informed action on today's highly resilient complex problems and can deal effectively with demanding contested and high stakes challenges

Advanced Studies in Efficient Environmental Design and City Planning Ferdinando Trapani, Nabil Mohareb, Federica Rosso, Denia Kolokotsa, Sreetheran Maruthaveeran, Mahmoud Ghoneem, 2021-09-24 This book explains how learning from past mistakes in urban design can help to enhance sustainable cities and how the principles of Green Urbanism can yield more resilient urban settlements Environmental design is a fundamental principle in shaping cities However environmental challenges like increased resource consumption water degradation and waste related issues are among the greatest problems now facing humanity which is why these issues need to be considered with regard to smart cities either for the

development of new urban centers or for the transformation of existing cities The book not only discusses the importance of integrating sustainability principles in the urban design process but also demonstrates their application to the development of sustainable cities As such the book offers essential information and a source of inspiration for all those who want to build more sustainable cities

Planning Singapore Stephen Hamnett, Belinda Yuen, 2019-05-08 Two hundred years ago Sir Stamford Raffles established the modern settlement of Singapore with the intent of seeing it become a great commercial emporium and fulcrum But by the time independence was achieved in 1965 the city faced daunting problems of housing shortage slums and high unemployment Since then Singapore has become one of the richest countries on earth providing in Sir Peter Hall's words perhaps the most extraordinary case of economic development in the history of the world The story of Singapore's remarkable achievements in the first half century after its independence is now widely known In *Planning Singapore The Experimental City* Stephen Hamnett and Belinda Yuen have brought together a set of chapters on Singapore's planning achievements aspirations and challenges which are united in their focus on what might happen next in the planning of the island state Chapters range over Singapore's planning system innovation and future economy housing biodiversity water and waste climate change transport and the potential transferability of Singapore's planning knowledge A key question is whether the planning approaches which have served Singapore so well until now will suffice to meet the emerging challenges of a changing global economy demographic shifts new technologies and the existential threat of climate change Singapore as a global city is becoming more unequal and more diverse This has the potential to weaken the social compact which has largely existed since independence and to undermine the social resilience undoubtedly needed to cope with the shocks and disruptions of the twenty first century The book concludes however that Singapore is better placed than most to respond to the challenges which it will certainly face thanks to its outstanding systems of planning and implementation a proven capacity to experiment and a highly developed ability to adapt quickly purposefully and pragmatically to changing circumstances

Out of the Woods Julia Corbett, 2018-09-01 2018 Reading the West Book Awards Nonfiction Winner Have you ever wondered about society's desire to cultivate the perfect lawn why we view some animals as good and some as bad or even thought about the bits of nature inside everyday items toothbrushes cell phones and coffee mugs In this fresh and introspective collection of essays Julia Corbett examines nature in our lives with all of its ironies and contradictions by seamlessly integrating personal narratives with morsels of highly digestible science and research Each story delves into an overlooked aspect of our relationship with nature insects garbage backyards noise open doors animals and language and how we cover our tracks With a keen sense of irony and humor and an awareness of the miraculous in the mundane Julia recognizes the contradictions of contemporary life She confronts the owner of a high end market who insists on keeping his doors open in all temperatures Takes us on a trip to a new mall with a replica of a trout stream that once flowed nearby The phrase out of the woods guides us through layers of meaning to a contemplation of grief remembrance and resilience Out of

the Woods leads to surprising insights into the products practices and phrases we take for granted in our everyday encounters with nature and encourages us all to consider how we might re value or reimagine our relationships with nature in our everyday lives

Building Paradise Harry Francis Mallgrave, 2021-09-29 A sweeping historical study Building Paradise seeks to construct a garden ethic for the design arts It is an ethic predicated on the idea that with our recent ecological and biological insights we can build more intelligently than the status quo of current design practices The paradisiacal instinct is the motivation behind every artistic impulse From its theological origins to the present the idea of paradise the garden as a place of peace beauty and happiness has acquired numerous meanings It was a motif expounded in the earliest cultures of Mesopotamia Egypt and the Indus Valley and it later became a dominant feature of Buddhist Judeo Christian and Islamic practices It informed Greco Roman mythologies and the design of a Japanese garden it was a motivation for the Renaissance humanists and was complicit in visions of a New Arcadia within the landscapes of the Americas This book underscoring how the built and urban environments shapes culture takes a biophilic approach and draws upon the major advances of the human sciences of the last few decades to argue on behalf of a design ethic centered squarely on human needs and aspirations Written for students and academics within architecture and all related fields this book focuses on the efforts to build paradise in a material way

Biophilic Cities Timothy Beatley, 2011 *Biophilic Cities* makes a powerful case for placing nature at the center of urban life Tim Beatley argues that true sustainability goes beyond infrastructure it requires cities that nurture our innate connection to the natural world Drawing on global examples he shows how urban areas can weave nature into every layer of design and planning creating healthier more vibrant and resilient communities

The Case for Cities Vikas Mehta, Danilo Palazzo, Conrad Kickert, Christopher Auffrey, Terry Grundy, 2024-07-31 The fateful year 2020 brought dramatic challenges to American cities The COVID 19 pandemic and the civil unrest caused by the killing of George Floyd led to a cascade of negative media stories about cities often politically motivated It seemed possible that the economic and demographic gains cities had achieved over the last few decades could be lost In fact there has been

measurable population loss in larger cities caused by changing work life patterns and changing public perceptions about the costs and benefits of urban living Faced with these challenges advocates for cities must make a vigorous case for cities and show how they aren't the cause of America's social environmental economic and public health problems but in fact are the places where the solutions to those problems will be found The 38 chapters in *The Case for Cities* draw on the expertise of contributors from the academic professional and civic sectors to explore the creative tension between the two great values on which the vigor of cities depends that they should be Cities of Choice places where people who have choice want to live and Cities of Justice places that welcome and support people with limited choices The book's underlying perspective is that these two values are symbiotic and that promoting both is what leads to viable sustainable urban resurgence This book will be of keen interest to students and practitioners in urban planning urban design real estate architecture and landscape architecture and to urban advocates and civic leaders

Revising Smart Cities with Regenerative Design Zaheer Allam, Peter Newman, 2023-04-12 This book presents a road map to urban regeneration through the contemporary concept of smart cities It investigates why the concept has gained adoption as it has but until now it has been geared towards a profit making venture by large corporations and ignoring the economic aspirations of smaller companies and city councils The technologies can provide enhanced liveability levels if the concept is redefined This work will be of interest to academics and policy makers looking at exploring how to drive urban regeneration in a sustainable and inclusive fashion while supporting local economies It presents a case study of Port Louis Mauritius with unique insights and data Academics policy makers and urban developers could potentially adopt the model and calibrate it to various cities and quantify the economic and social benefits
