## **Book Reproductive States Perspectives Implementation Population:**

Science for Governing Japan's Population Aya Homei, 2022-11-17 Twenty first century Japan is known for the world's most aged population. Faced with this challenge, Japan has been a pioneer in using science to find ways of managing a declining birth rate. Science for Governing Japan's Population considers the question of why these population phenomena have been seen as problematic. What roles have population experts played in turning this demographic trend into a government concern? Aya Homei examines the medico-scientific fields around the notion of population that developed in Japan from the 1860s to the 1960s, analyzing the role of the population experts in the government's effort to manage its population. She argues that the formation of population sciences in modern Japan had a symbiotic relationship with the development of the neologism population jink and with the transformation of Japan into a modern sovereign power. Through this history, Homei unpacks assumptions about links between population sovereignty and science. This title is also available as Open Access.

Reproductive States Rickie Solinger, Mie Nakachi, 2016-01-04 In *Reproductive States*, a group of international scholars explore the population politics, policies, and practices adopted in various countries and offer reflections on the outcomes of those policies and their legacies. The essays in this volume focus on the context that stimulated nations to develop demographic imperatives regarding population size and quality and consider how those imperatives became unique sets of priorities and strategies. They also illuminate how these nations crafted their own policies and practices often while responding to United Nations and U.S.-driven population goals, tactics, and interventions.

Development and Women's Reproductive Health in Ghana, 1920-1982 Holly Ashford, 2022-12-09 This book investigates the history of women's reproductive health in Ghana, arguing that between the 1920s and 1980s it was largely driven by discourses of development and population control rather than a concern for women's health or rights. Between the 1920s and 1980s, the choices that Ghanaian women made regarding their reproductive health were defined by development policy and practice. Spanning the colonial and immediate postcolonial periods, this book demonstrates that whilst the substance of development discourse shifted over time, principles of development continued to be used to impact and legitimise reproductive health policy and practices well after independence. The book explores Ghana's pluralist health system, the introduction of maternal and child welfare, the dominance of the Red Cross in Ghana's maternal and child health landscape, nationalist pronatalism, and global population activism. In order to understand how global iterations of development and health policy impacted ordinary lives in Ghana, the author uses evidence from multiple levels, including private papers, national archives, and records of international and transnational organisations. Providing balanced archival perspectives, the book includes extensive oral history interviews carried out with both rural Ghanaian women and traditional birth attendants, as well as with midwives, doctors, and family planning fieldworkers. This book will have an important impact on a number of historical fields, including Ghanaian history, global health history, global histories of population and family planning, and histories of development. It will be of interest to

**A Global History of Sexual Science, 1880-1960** Veronika Fuechtner, Douglas E.

Haynes, Ryan M. Jones, 2018 Sex has no history but sexual science does Starting in the late nineteenth century scholars and activists all over the world suddenly began to insist that understandings of sex be based on science As Japanese and Indian sexologists influenced their German British and American counterparts and vice versa sexuality modernity and imaginings of exotified Others became intimately linked The first anthology to provide a worldwide perspective on the birth and development of the field A Global History of Sexual Science contends that actors outside of Europe in Asia Latin America and Africa became important interlocutors in debates on prostitution birth control or transvestitism Ideas circulated through intellectual exchange travel and internationally produced and disseminated publications Twenty scholars tackle specific issues including the female orgasm and the criminalization of male homosexuality to demonstrate how concepts and ideas introduced by sexual scientists gained currency throughout the modern world

**8 Billion and Counting: How Sex, Death, and Migration Shape Our World** Jennifer D. Sciubba, 2022-03-29 A provocative description of the power of population change to create the conditions for societal transformation As the world nears 8 billion people the countries that have led the global order since World War II are becoming the most aged societies in human history At the same time the world's poorest and least powerful countries are suffocating under an imbalance of population and resources In 8 Billion and Counting political demographer Jennifer D Sciubba argues that the story of the twenty first century is less a story about exponential population growth as the previous century was than it is a story about differential growth marked by a stark divide between the world's richest and poorest countries Drawing from decades of research policy experience and teaching Sciubba employs stories and statistics to explain how demographic trends like age structure and ethnic composition are crucial signposts for future violence and peace repression and democracy poverty and prosperity Although we have a diverse global population demographic trends often follow predictable patterns that can help professionals across the corporate nonprofit government and military sectors understand the global strategic environment Through the lenses of national security global health and economics Sciubba demonstrates the pitfalls of taking population numbers at face value and extrapolating from there Instead she argues we must look at the forces in a society that amplify demographic trends and the forces that dilute them particularly political institutions or the rules of the game She shows that the most important skills in demographic analysis are naming and being aware of your preferences rethinking assumptions and asking the right questions Provocative and engrossing 8 Billion and Counting is required reading for business leaders policy makers and anyone eager to anticipate political economic and social risks and opportunities A deeper understanding of fertility mortality and migration promises to point toward the investments we need to make today to shape the future we want tomorrow

**Pregnancy and Power, Revised Edition** Rickie Solinger, 2019-07-16 A sweeping chronicle of women's battles for reproductive freedom Reproductive politics in the United States has always been about who has the power to decide lawmakers the courts clergy physicians or the woman herself Authorities have rarely put women's needs and interests at the

center of these debates Instead they have created reproductive laws and policies to solve a variety of social and political problems with outcomes that affect the lives of different groups of women differently Reproductive politics were at play when slaveholders devised breeding schemes when the US government took indigenous children from their families in the nineteenth century and when doctors pressured Latina women to be sterilized in the 1970s Tracing the main plot lines of women s reproductive lives the leading historian Rickie Solinger redefines the idea of reproductive freedom putting race and class at the center of the effort to control sex and pregnancy in America over time Revisiting these issues after more than a decade this revised edition of *Pregnancy and Power* reveals how far the reproductive justice movement has come and the renewed struggles it faces in the present moment Even after nearly a half century of reproductive rights a cascade of new laws and policies limits access and prescribes punishments for many people trying to make their own reproductive decisions In this edition Solinger traces the contemporary rise of reproductive consumerism and the politics of free market health care as economic inequality continues to expand in the US revealing the profound limits of choice and the continued need for the reproductive justice framework

**Birth of Democratic Citizenship** Maria Bucur-Deckard, Mihaela Miroiu, 2018-10-01 What is it like to be a woman living through the transition from communism to democracy What effect does this have on a woman s daily life on her concept of herself her family and her community *Birth of Democratic Citizenship* presents the stories of women in Romania as they describe their experiences on the journey to democratic citizenship In candid and revealing conversations women between the ages of 24 and 83 explain how they negotiated their way through radical political transitions that had a direct impact on their everyday lives Women who grew up under communism explore how these ideologies influenced their ideas of marriage career and a woman s role in society Younger generations explore how they interpret civic rights and whether they incorporate these rights into their relationships with their family and community Beginning with an overview of the role women have played in Romania from the late 18th century to today *Birth of Democratic Citizenship* explores how the contemporary experience of women in postsocialist countries developed The women speak about their reliance on and negotiations with communities ranging from family and neighbors to local and national political parties *Birth of Democratic Citizenship* argues that that the success of democracy will largely rely on the equal incorporation of women in the political and civic development of Romania In doing so it encourages frank consideration of what modern democracy is and what it will need to be to succeed in the future

**Intimate Politics** Cassia Roth, Diana Paton, 2024-08-23 This book places the intimate experience of fertility control at the heart of political and social approaches toward women s bodies Across the globe women have always controlled their fertility through intimate efforts ultimately tied to larger political processes and gendered power dynamics Women s biological reproductive capabilities have been contested sites of power struggles shaping the formation rule and dissolution of political regimes throughout history Yet these intersections between the intimate and the political remain understudied in the historical literature This book explores these

questions from the perspective of multiple time periods geographic locations actors and methods Chapters analyze how women s individual practices of fertility control including contraception abortion and infanticide alongside methods for achieving conception and birth intersected with larger political economic and cultural trends Others problematize the ideas of control in history What did it mean to control one s fertility in different historical periods and geographical regions How did historical actors understand and practise what we now call fertility control How can we expand conventional definitions of fertility control to interrogate ideas related to infertility menstruation and heteronormativity Contributors also highlight how race ethnicity and class intersect with gender to shape if and how women and men approached fertility control This book will be of great value to students and scholars of history including the history of the body women s rights and health equity as well as the intersectionality of gender and health The chapters in this book were originally published as a special issue of Women s History Review

Alexis, 2022-04-25 In Kevin MacDonald's Metaphysical Failure Jonas E. Alexis offers a thoroughly researched nuanced and lucid analysis of Kevin MacDonald's thought in particular MacDonald's belief in biological and philosophical Darwinism. It is an important book that fills a critical gap in the literature on the history of revolutionary movements and Darwinism both in the West and in Asia. It is also a study that adds many significant strands to the densely interwoven history of ideas such as Malthusianism and Eugenics. Alexis's book engages debates in the history of ideas going back to Madison Grant and beyond and the history of Darwinism. It challenges many of the life-long prevailing assumptions about identity politics and produces a powerful critique of how scientific theories have been misused to uphold misguided and faulty categorizations. Powerfully reasoned and backed with a startling array of documented studies, Kevin MacDonald's Metaphysical Failure presents an in-depth look at key beliefs behind many mistaken and consequently destructive actions taken by numerous writers and thinkers particularly Darwin's ardent enthusiasts and devoted disciples. The book presents eye-opening insights into the historical development of Darwin's ideological project and how that project ended up crippling Darwin's intellectual children from Richard Dawkins, Francis Crick, James Watson, Daniel Dennett, Ernst Mayr, and E. O. Wilson to Kevin MacDonald, Richard Spencer, David Duke, and Jared Taylor.

Nationalizing Sex Richard Togman, 2019-02-13 Nationalizing Sex explains how governments worldwide have tried to nationalize sex and harness procreation as a tool of the state. By using case studies from France, Germany, Russia, India, and China, it examines how population emerged as an object of governance and how natalist policy has changed over time and place. Nationalizing Sex analyzes the origins, growth, and development of fertility as a national and international political issue, the rise and fall of the narratives used to ascribe meaning to natality, and the global proliferation of oddly similar policies adopted by widely dissimilar states. Ultimately, this book explains why government seeks to harness the womb as a state resource.

**The Century of Women** Maria Bucur, 2018-04-05 This innovative text explores the unprecedented changes in the realms of politics, demography, economics, culture, knowledge, and kinship that women have brought about in the twentieth and twenty-first centuries. Global in reach, the book provides a comparative analysis of developments worldwide to show both progress as well as new tensions and forms of inequality that have emerged out of women's entry into politics, wage employment, education, and the production of culture. Beginning with suffrage and moving to participation in international movements such as anti-war, labor, and environmental rights activism, Maria Bucur explores how women have transformed the operation of states and international institutions. She focuses on the radical demographic shifts since 1900 through the prism of changing practices in women's sexuality from birth control practices to education. Examining the continuing economic gender gap around the world, Bucur highlights ways women have been both beneficiaries of new economic opportunities and participants in developing new forms of inequality. Considering

the remarkable achievements of women in the areas of knowledge making and cultural production the author shifts her gaze toward the future and what these changes mean in terms of gender norms and evolving kinship relations She thus presents a new perspective on contemporary world history centered on how women have become both the subjects and objects of seismic shifts in the political social and economic structures of societies across the globe The World Health Organization Marcos Cueto, Theodore M. Brown, Elizabeth Fee, 2019-04-11 A history of the World Health Organization covering major achievements in its seventy years while also highlighting the organization's internal tensions This account by three leading historians of medicine examines how well the organization has pursued its aim of everyone everywhere attaining the highest possible level of health »Wenn die Chemie stimmt ..."
