

TOOLS

The tools should be carefully trimmed from the "tool tree" with a sharp knife. Do not break them off by hand. Clean up any rough edges and smooth parting lines with your knife before using them.

The blending tool is used for blending putty into corners and over irregular surfaces, both ends of the tool may be used. The putty knife is used to scrape off excess putty after you have applied it to the model. The tweezers are used for holding small parts for cementing and painting. The putty applicator is used for applying the putty to your model after it is mixed and kneaded. The two-piece sanding stick is used for holding small strips of sandpaper and sanding larger areas and contours on your model. Wrap the strip of sandpaper around one half and snap the other half to it to secure the sandpaper.

The tools are made of a plastic that is not affected by styrene plastic cement or paints. They may be cleaned without damage after use.

TROPHYS AND STANCHIONS

Assemble the trophies and stanchions as shown. You may display all or some of them around your finished model. Using embroidery thread or string, arrange the assembled stanchions around your model by stringing the thread through the holes in the top of the stanchions. Place a decal (or make up your own sign) on the display board to tell about the car.
