Historical Dictionary of Environmentalism Peter Dauvergne, 2016-09-09 To capture the diversity within environmentalism this dictionary takes a global tack with a focus on ideas events institutions initiatives and green movements since the 1960s It strives to avoid a common error in many histories of environmentalism to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa Asia South and Central America and the Polar Regions It aims as well for a more comprehensive analysis than most histories of the modern environmental movement understanding environmentalism as emerging not only from grassroots and formal nongovernmental associations

but also from corporate governmental and intergovernmental organizations and initiatives This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources from corporate boardrooms to bureaucratic policies to international negotiations to activists Thus environmentalists are not only indigenous people blocking a logging road Greenpeace activists protesting a seal hunt or green candidates contesting an election an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies within the World Bank to assess the environmental impacts of loans within Wal Mart to green its purchasing practices or within intergovernmental forums to negotiate international environmental agreements This second edition of Historical Dictionary of Environmentalism contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries on important events issues organizations ideas and people shaping the direction of environmentalism worldwide This book is an excellent access point for students researchers and anyone wanting to know more about environmentalism

The A to Z of Environmentalism Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries

The British National Bibliography Arthur James Wells, 2006

Essential Environment Jay Withgott, Scott R. Brennan, 2007 The Science Behind the Stories retains all the popular features of the landmark first edition including its integrated central case study approach and focus on the scientific process current data and critical thinking in a brief 15 chapter text The Second Edition features a new chapter on ecology with expanded coverage of community ecology and biomes New end of chapter activities and interactive exercises on the Environmental Place Website help students hone the skills they need to make informed decisions on environmental issues Calculating Ecological Footprint activities at the end of each chapter give students practice in applying individual decisions to larger scales The Investigate It interactive map on the website provides more than 120 additional case studies You Decide web activities help students learn how to analyze data on global warming and conservation
