Something in These Hills John M. Coggeshall,2022-09-07 What is the something in these hills that ties mountain families to family land in the southern Appalachians This ethnographic examination challenges contemporary theory and explores two interrelated themes the duality of the southern Appalachians as both a menacing and majestic landscape and the emotional relationship to family land characteristic of long term residents of these mountains To most outsiders the area conjures images of a beautiful yet dangerous place typified by the movie Deliverance To long term residents these mountains have a fundamental emotional hold so powerful that many mourn the sale or loss of family land as if it were a deceased relative How can the same geographical space be both Using a carefully crafted cultural lens John M Coggeshall explains how family land anthropomorphizes metaphorically becoming another member of kin groups He establishes that this emotional sense of place existed prior to recent land losses contrary to some contemporary scholars Utilizing the voices and perspectives of long term residents the book provides readers with a more fundamental understanding of the something in these hills that holds people in place

A World on the Wing: The Global Odyssey of Migratory Birds Scott Weidensaul, 2021-03-30 New York Times Bestseller Finalist for the Los Angeles Times Book Prize A Library Journal Best Science and Technology Book of the Year An exhilarating exploration of the science and wonder of global bird migration In the past two decades our understanding of the navigational and physiological feats that enable birds to cross immense oceans fly above the highest mountains or remain in unbroken flight for months at a stretch has exploded What we've learned of these key migrations how billions of birds circumnavigate the globe flying tens of thousands of miles between hemispheres on an annual basis is nothing short of extraordinary Bird migration entails almost unfathomable endurance like a sparrow sized sandpiper that will fly nonstop from Canada to Venezuela the equivalent of running 126 consecutive marathons without food water or rest avoiding dehydration by drinking moisture from its own muscles and organs while orienting itself using the earth's magnetic field through a form of quantum entanglement that made Einstein queasy Crossing the Pacific Ocean in nine days of nonstop flight as some birds do leaves little time for sleep but migrants can put half their brains to sleep for a few seconds at a time alternating sides and their reaction time actually improves These and other revelations convey both the wonder of bird migration and its global sweep from the mudflats of the Yellow Sea in China to the remote mountains of northeastern India to the dusty hills of southern Cyprus This breathtaking work of nature writing from Pulitzer Prize finalist Scott Weidensaul also introduces readers to those scientists researchers and bird lovers trying to preserve global migratory patterns in the face of climate change and other environmental challenges Drawing on his own extensive fieldwork in A World on the Wing Weidensaul unveils with dazzling prose the miracle of nature taking place over our heads
