Mozambique The Troubled Transition From Socialist Construction To Free Market Capitalism:

Mozambique Hans Abrahamsson, Anders Nilsson, 1995-05 Analyzes the socio economic and political developments in Mozambique over the past 20 years documenting the transition from socialism to market capitalism Looks at international regional national and local factors and the prospects for pursuing such a strategy in a country with almost no indigenous capital owning and entrepreneurial class Paper edition unseen 25 00 Distributed by Humanities Annotation copyright by Book News Inc Portland OR Mozambique, the Troubled Transition ,1995 **The Uncertain Promise of Southern Africa** York W. Bradshaw, Stephen N. Ndegwa, 2000 In the 1970s and 1980s Indiana University Press published a series of books edited by Gwendolen Carter and others on economic and political conditions in Southern Africa during the apartheid era The Uncertain Promise of Southern Africa is a return to that successful format in the post apartheid era Leading scholars analyze the economic political social and cultural conditions in Southern Africa and the prospects for the region The first part of the book examines the current political and development situation in six countries South Africa Namibia Botswana Zimbabwe Angola and Mozambique The second part focuses on issues of enduring importance in the region education health gender the law intra and inter regional power relations international commerce and popular culture Transforming Mozambique M. Anne Pitcher, 2002-11-14 Many of the economic transformations in Africa have been as dramatic as those in Eastern Europe Yet much of the comparative literature on transitions has overlooked African countries This 2002 study of Mozambique s shift from a command to a market economy draws on a wealth of empirical material including archival sources interviews political posters and corporate advertisements to reveal that the state is a central actor in the reform process despite the claims of neo liberals and their critics Alongside the state social forces from World Bank officials to rural smallholders have also accelerated thwarted or shaped change in Mozambique M Anne Pitcher offers an intriguing analysis of the dynamic interaction between previous and emerging agents ideas and institutions to explain the erosion of socialism and the politics of privatization in a developing country She demonstrates that Mozambique s political economy is a heterogenous blend of ideological and institutional continuities and ruptures *Decolonizing Civil Society in Mozambique* Tanja Kleibl, 2021-08-26 By demonstrating that Western conceptions of civil society have provided the framework for interpreting societies in the Global South Decolonizing Civil Society in Mozambique argues that it is only through a critical deconstruction of these concepts that we can start to re balance global power relationships both in academic discourse and in development practices Examining the exclusionary discourses framing the support for Western type NGOs in the development discourse often to the exclusion of local social actors this book dissects mainstream contemporary ideas about civil society and finds a new means by which to identify local forms of social action often based in traditional structures and spiritual discourses Outlining new conceptual ideas for an alternative framing of Mozambique s civil society Kleibl proposes a series of fresh theoretical issues and questions alongside empirical research moving towards a series of new policy and

practice arguments for rethinking and decolonizing civil society in the Global South *The Politics of Precarity* Gediminas Lesutis, 2021-12-30 Based on critical theory and ethnographic research this book explores how intensifying geographies of extractive capitalism shape human lives and transformative politics in marginal areas of the global economy Engaging the work of Judith Butler Henri Lefebvre and Jacques Rancière with ethnographic research on social and political effects of mining induced dispossession in Mozambique in the book Lesutis theorises how precarity unfolds as a spatially constituted condition of everyday life given over to the violence of capital Going beyond labour relations or governance of life in liberal democracies that are typically explored in the literature on precarity the book shows how dispossessed people are subjected to structural symbolic and direct modalities of violence this simultaneously constitutes their suffering and ceaseless desire however implausible to be included into abstract space of extractivism As a result despite the multifarious violence that it engenders extractive capital accumulation is sustained even in the margins historically excluded from contingently lived imaginaries of a good life promised by capitalism Presenting this theorisation of precarity as a framework on and a critique of the contemporary politics of unliveability the book speaks to key debates about precarity dispossession resistance extractivism and development in several disciplines especially political geography IPE global politics and critical theory It will also be of interest to scholars in development studies critical political economy and African politics Beyond Peacebuilding Roberta Holanda Maschietto, 2016-10-12 This book uses the concept of empowerment as a means to understand peacebuilding in Mozambique In order to do this it first traces the different discourses on empowerment and proposes an analytical framework based on multiple levels of analysis and a dialectical view of power Second it examines how the process of state formation and later peacebuilding have shaped the spaces for local empowerment to occur in Mozambique Finally it offers a detailed analysis of a national policy called the District Development Fund the 7 million designed in the context of decentralization and aimed at reducing poverty in this country This case study helps reflecting on the long term and derivative effects of peace both in institutional terms as well as at the level of the everyday The holistic approach to empowerment offered in this book and its application in the case of Mozambique will be of interest to both academics as well as practitioners of peacebuilding and development *The Dialectics of Inquiry Across the Historical Social Sciences* David Baronov, 2013-11-07 This book turns conventional global historical analysis on its head demonstrating first that local events cannot be derived logically or historically from large scale global historical structures and processes and second that it is these structures and processes that in fact emerge from our analysis of local events This is made evident via an analysis of three disparate events the New York City Draft Riots AIDS in Mozambique and a 2007 flood in central Uruguay In each case Baronov chronicles how expressions of human agency at the level of those caught up in each event give form and substance to various abstract global historical concepts such as slavery in the Americas global capitalist production and colonial postcolonial Africa Underlying this repositioning of the local and the ephemeral is an immanent

phenomenological analysis that illustrates how mere transient events are the progenitors of otherwise abstract global historical concepts Traversing the intersections of human agency and structural determinism Baronov deftly retains the nuance and serendipity of everyday life while deploying this nuance and serendipity to further embellish our understanding of those enduring global historical structures and processes that shape large scale long term historical accounts of social and cultural change across the historical social sciences

Soldiers at Peace J. Schafer,2007-07-23 This is the first scholarly study of soldiers and guerrillas demobilized after the civil war in Mozambique 1979 1992 The book examines former soldiers from both sides return to civilian life and how their identity as veterans plays out in the political sphere

Working the System in Sub-Saharan Africa Corrado Tornimbeni,2014-07-08 What is the extent to which democracy good governance liberal citizenship and development are negotiated and shaped in sub Saharan African countries in the context of the globalised world Is this a characteristic of the current historical era alone Do global ideas about politics and development in sub Saharan Africa take on new meanings in light of local circumstances and visions The works presented in this volume offer context based analyses that contribute to showing how local practices of citizenship democracy and development in sub Saharan Africa have been working the system of global ideas on good governance policies and development and how this system also builds on the way in which historically local narratives are presented to actors in the international context Democracy and good governance are considered the universally shared paradigms shaping policy prescriptions and development practices in the context of the current globalised world Space for negotiating these recipes at the local level is considered to be particularly narrow especially in sub Saharan Africa but it is also believed that international paradigms are reshaped into peculiar forms when implemented under local circumstances From the early 1990s onwards these processes have drawn the attention of academics as well as the wider public but rarely is their historical dimension taken into account the Africa world nexus in politics and development is not a characteristic of the current global world alone as is too often assumed Adding an historical perspective to the analysis of the multilevel interconnections between local power relations the politics of colonial and independent rule and the global discourses of democracy citizenship and development will contribute to a sound theoretical stance in addressing what is considered the main feature of current times globalisation and its flows That is what this volume tries to accomplish It does so by developing three themes in particular the trajectory of the colonial and independent nation state and its impact on the local and national politics of citizenship identity and development the way global ideas on development are converted into practice or how they are interpreted and negotiated at local level and issues of belonging and identity in relation to concepts and practices of political control Case studies will include Portuguese colonialism Mozambique Tanzania Zimbabwe Senegal Casamance and Uganda

Peacekeeping in Africa Oliver Furley, Roy May, 2021-05-11 First published in 1998 Peacekeeping in Africa was written to help make up the shortfall in the number of books that concentrated specifically on peacekeeping in Africa The book covers the main peacekeeping operations of Africa and provides a wealth of background material In doing so it explores the policies and actions of the international organisations concerned and the participating African states It also considers the impact of sub regional powers and the role of the USA Britain and France Comprising three parts Peacekeeping in Africa examines world perspectives case studies and wider issues surrounding Africa's peacekeeping operations **A History of Postcolonial Lusophone Africa** Patrick Chabal, David Birmingham, 2002-06-13 useful timely and important a good and informative book on the Lusophone countries Portuguese colonialism and postcolonial influences Phyllis Martin Indiana University This book produced by the obvious and distinguished corps of country specialists fills a real gap in both state level and regional broadly defined studies of contemporary Africa Norrie MacQueen University of Dundee Although the five Portuguese speaking countries in Africa that gained independence in 1974 75 Angola Mozambique Guinea Bissau Cape Verde and S o Tom e Pr ncipe differ from each other in many ways they share a history of Portuguese rule going back to the 15th century which has left a mark to this day Patrick Chabal and his co authors assess the nature of the Portuguese legacy using a twofold approach In Part I three analytical thematic chapters by Chabal examine what the five countries have in common and how they differ from the rest of Africa In Part II individual chapters by leading specialists each devoted to a specific country survey the histories of those countries since independence The book places the postcolonial experience of the Lusophone countries within the context of their precolonial and colonial past and compares and contrasts their experience with that of non Lusophone African states The result is a comprehensive readable and up to date text and reference work on the evolution of postcolonial Portuguese speaking Africa **The Politics of Peace in Mozambique** Carrie Manning, 2002-11-30 Manning examines issues of democratization and conflict resolution through the lens of the Mozambican experience from 1992 2000 Since the end of the Cold War a formal democratization process has been at the center of virtually every negotiated peace agreement to end a civil conflict Nearly a decade after the Rome peace accord put an end to 16 years of civil war Mozambique stands out as one of the world's most unlikely postwar democratization success

stories What accounts for the durability of the postwar political settlement What lessons does the Mozambican experience hold for other such cases Relying on original research conducted in Mozambique between 1994 and 1999 Manning argues that the country's relatively successful postwar political settlement depends upon the ability of the system to accommodate conflicting notions of democratic and system legitimacy through routine recourse to processes of sustained elite bargaining which supplement formal democratic institutions In building her case Manning provides a thorough and provocative analysis of the country's civil conflict presents ground breaking work on the transformation of the Renamo rebel group into a political party and the separation of the Relimo party state into its respective components and he presents a clear eyed analysis of the lessons and limits of Mozambique's postwar success Of particular interest to scholars students and policymakers involved with democratization conflict resolution and southern African politics *The Political Economy of Africa* Vishnu

Padayachee,2010-06-10 The Political Economy of Africa aims to fill a major gap in the existing literature by exploring the economy and economics of Africa The book has a critical approach from the perspective of political economy rather than mainstream economics This book addresses the seemingly intractable economic problems of the African continent and trace their origins but also always to bring out the instances of successful economic change and the possibilities for economic revival and renewal

The Making of Democrats C. Manning,2008-03-31 Can elections create democrats Why and how do formerly armed opposition groups decide to invest in electoral politics or to undermine them This book argues that the answer lies in the patterns of inter and intraparty struggles created by participation in repeated elections over time

Decentralization and Constitutionalism in Africa Charles M. Fombad,Nico Steytler,2019-09-10 This collection of essays assesses the efforts of African governments to constitutionalise decentralisation be it in the form of federalism local government or traditional authorities Since the end of the Cold War jurisdictions across Africa have witnessed an ostensible return to multi party democracy within the paradigm of constitutionalism and the rule of law Linked to the democratisation process many countries took steps to decentralize power by departing from the heavily centralized systems inherited from colonial regimes The centralization of power typically characterized by the personalization and concentration of power in the hands of leaders and privileged elites in capital cities mostly resulted in repressive regimes and fragile states As decentralisation is a response to these challenges this volume analyses the dynamic relationship between the efforts to implement decentralization and presence or absence of constitutionalism This volume examines a variety of forms and degrees of decentralization found across Africa It advances a new understanding of trends and patterns and facilitates the exchange of ideas among African governments and scholars about the critical role that decentralisation may play in democratization of and constitutionalism in Africa Mozambique at a Fork in the Road António S. Cruz,Ines A.

Ferreira,Johnny Flentø,Finn Tarp,2023-12-21 Few countries have experienced as many political and economic changes as Mozambique A vast and diverse country it faced a particularly difficult start after a long period of colonial dominance

followed by a deadly war that formally ended only in 1992. However, despite impressive growth after multi party elections, Mozambique's pattern of growth is fragmented, not sustainable and non inclusive. Investigating the deep factors that undermine economic development, Mozambique at a Fork in the Road offers an insightful analysis of the historical and political context of Mozambique and its institutional constraints to economic development. It examines sectors that are critical for sustainable growth such as agriculture that receive low priority and the frequent shocks in strategic policy that result in the absence of a clear national development vision. Building on a core set of thematic chapters, this compelling diagnostic tool provides a thorough and structured approach to understanding institutional dimensions of development. This title is also available as Open Access on Cambridge Core. [Explaining Global Poverty](#) Branwen Gruffydd Jones, 2007-01-24

The twenty first century is characterized by extremes of poverty and wealth of scarcity and abundance. The vast inequalities of wealth distribution between the developed west and the impoverished developing world is a complex problem. This book recognises that Africa in particular has manifested this global disgrace and symbolizes the nature of poverty to the western world. In order to truly emancipate the poverty stricken around the world, we must necessarily understand the reasons for its existence. In a departure from traditional critical realist theory, Gruffydd Jones argues the benefits of reassessing the relevance of objective inquiry and emphasizes its primacy over normative theory in the battle to truly understand the reasons for the African crisis. This approach brings us a book of real relevance for inequality in the modern world and gives us an important platform from which to move forwards in the fight against poverty.

Human Rights Under African Constitutions Abdullahi Ahmed An-Na'im, 2013-10-09

Some of the most massive and persistent violations of human rights occur in African nations. In *Human Rights Under African Constitutions: Realizing the Promise for Ourselves*, scholars from a wide range of fields present a sober systematic assessment of the prospects for legal protection of human rights in Africa. In a series of detailed and highly contextual studies of Ethiopia, Ghana, Guinea, Morocco, Mozambique, Nigeria, Rwanda, Senegal, South Africa, Sudan, and Uganda, experts seek to balance the socioeconomic and political diversity of these nations while using the same theoretical framework of legal analysis for each case study. Standards for human rights protection can be realized only through direct and strong support from a nation's legal and political institutions. The contributors to this volume uniformly conclude that a well informed and motivated citizenry is the most powerful force for creating the political will necessary to effect change at the national level. In addition to a critical evaluation of the current state of human rights protection in each of these African nations, the contributors outline existing national resources available for protecting human rights and provide recommendations for more effective and practical use of these resources.
