The Politics of Precarity Gediminas Lesutis, 2021-12-30 Based on critical theory and ethnographic research this book explores how intensifying geographies of extractive capitalism shape human lives and transformative politics in marginal areas of the global economy Engaging the work of Judith Butler Henri Lefebvre and Jacques Rancière with ethnographic research on social and political effects of mining induced dispossession in Mozambique in the book Lesutis theorises how precarity unfolds as a spatially constituted condition of everyday life given over to the violence of capital Going beyond labour relations or governance of life in liberal democracies that are typically explored in the literature on precarity the book shows how dispossessed people are subjected to structural symbolic and direct modalities of violence this simultaneously constitutes their suffering and ceaseless desire however implausible to be included into abstract space of extractivism As a result despite the multifarious violence that it engenders extractive capital accumulation is sustained even in the margins historically excluded from contingently lived imaginaries of a good life promised by capitalism Presenting this theorisation of precarity as a framework on and a critique of the contemporary politics of unliveability the book speaks to key debates about precarity dispossession resistance extractivism and development in several disciplines especially political geography IPE global politics and critical theory It will also be of interest to scholars in development studies critical political economy and African politics

Mozambique Hans Abrahamsson, Anders Nilsson, 1995-05-01 This is an account and analysis of the history of Mozambique The book looks at what the future held for the people of Mozambique following the end of the civil war and the ANC's rise to power in South Africa It explains how when it began the Frelimo liberation movement in Mozambique was intent on meeting the people's needs by building socialism The authors look at how the same movement underwent many changes eventually trying to rebuild a war ravaged economy by means of market capitalism

Regionalism and Uneven Development in Southern Africa Fredrik Söderbaum, Ian Taylor, 2018-05-08 This title was first published in 2003 This volume advances our understanding of how Southern Africa is currently being reconfigured critically examining what has been marketed as the flagship of the Spatial Development Initiative programme in Southern Africa the Maputo Development Corridor MDC By examining a variety of cross cutting levels of governance and development and by focusing on the nexus between the formal and informal processes that stake out the MDC this volume contributes to a detailed understanding of what is perhaps the most important current experiment in regionalism in Africa By engaging regional processes on the micro level and on the

ground there is a special emphasis on how local communities regard and respond to the Corridor initiative All chapters in the volume are the result of extensive fieldwork in both Mozambique and South Africa and the contributions are drawn from the region and beyond including Botswana Mozambique Zimbabwe South Africa Sweden and the United States **Geography and Economy in South Africa and its Neighbours** Christian M. Rogerson,2017-05-15 The dismantling of the apartheid regime in South Africa caused massive transformation in both geographical and economic terms not only in this country but also in the region as a whole As the post apartheid government enters its second term this captivating volume assesses its progress in unravelling the geography of apartheid both in South Africa itself and in its relationships with other countries in Southern Africa and Africa It also considers the ways in which South Africa now that it is no longer a pariah state has begun to position itself within the current global economy Examining South Africa s land and agriculture mining and minerals manufacturing tourism corporate finance the labour market and transport the volume discusses the challenges of balancing growth and redistribution the extent and nature of progress change and relationships within the regional and global economy A compelling investigation into the economics of South Africa s neighbouring states in relation to their natural resources colonialism and inter relationships with themselves and with South Africa leads to a focus on the region as a whole and its relations with the global economy **Underdevelopment and the Transition to Socialism** James H.

Mittelman,2013-09-24 Underdevelopment and the Transition to Socialism Mozambique and Tanzania evaluates the promise and problems of socialism in the Third World by considering the political economies of Mozambique and Tanzania The aim is to provide a basic account for Marxists and non Marxists alike interested in alternative strategies of development in the Third World It offers a materialist political economy approach that should be useful to an interdisciplinary group of scholars and practitioners The book is organized into four parts Part I maps out purposes and procedures Part II on Mozambique is a factually grounded analysis of an initial conjuncture in the transition to socialism the capture of state power by workers and peasants Part III on Tanzania focuses on another vital step on the way to socialism the nationalization of leading financial institutions and the attempt to place them under the aegis of the immediate producers Part IV knits together the main strands of the foregoing analysis and ties them to the broad themes discussed at the beginning of this book **Soldiers at**

Peace J. Schafer,2007-07-23 This is the first scholarly study of soldiers and guerrillas demobilized after the civil war in Mozambique 1979 1992 The book examines former soldiers from both sides return to civilian life and how their identity as veterans plays out in the political sphere **Dictating Development** Jonathan T. Kriekhaus,2010-06-15 Dictating

Development presents a powerful and original analysis of how colonialism has profoundly impacted the varying economic growth of developing nations While previous studies have focused primarily on the domestic neoliberal policies of government and the political capacity of developing states Dictating Development argues that economic growth is equally influenced positively and negatively by colonial powers Jonathan Kriekhaus examines both historic colonial influences on

human capital and state structures as well as contemporary ones war market access and foreign aid Based on an in depth study of the regionally diverse nations of Mozambique Korea and Brazil and a statistical analysis of growth in ninety one countries from 1960 to 2000 Krieckhaus effectively demonstrates that most seemingly domestic political variables are in fact the byproduct of relationships with colonial powers While not denying the role of neoliberalism as an important factor in development Dictating Development reveals the roots of these policies how colonialism influences the very nature of government and societal productivity *Aid that Works* James Manor,2007 Research in recent years on aid effectiveness shows that significant obstacles in fragile states insecurity poor governance and weak implementation capacity usually prevent aid from achieving the desired results in these environments This study investigates the attributes and effectiveness of donor supported programmes and projects that worked well under difficult conditions in fragile states Presented in this study are nine development initiatives in six less developed countries Afghanistan Cambodia Mozambique Sierra Leone Timor Leste and Uganda The cases show that development initiatives which engage local communities and local level governments are often able to have significant impact However for more substantial improvements to take places localized gains need to be scaled up either horizontally other localities or vertically to higher levels Given the advantages of working at the local level and the difficulty of working through mainstream bureaucratic agencies at higher levels in these countries donors often prefer to create parallel agencies to reach out to larger numbers of beneficiaries However this may in the long run weaken the legitimacy of mainstream government institutions and donor agencies may therefore choose to work as closely as possible with government officials from the beginning to build trust and demonstrating that new initiatives are non threatening and help prepare the eventual mainstreaming of parallel agencies The Making and Unmaking of Sovereign Territory Elizabeth M. Central Library and Documentation Bureau,1996 **Literacy, Power, and Democracy in Mozambique** Judith Marshall,2019-03-07 This book explores the relations between literacy and people s power in the context of Mozambique s project of socialist construction It probes the tensions between literacy as a tool for grassroots democracy versus literacy as a tool for mobilizing at the base for top down initiatives *Towards a History of Nationalities in Southern Africa* M.
