Safe Sex S. E. Sibanyoni, 2005 **Contingent Citizens** Elizabeth Hull, 2020-05-27 Contingent Citizens examines the ambiguous state of South Africa's public sector workers and the implications for contemporary understandings of citizenship. It takes us inside an ethnography of the professional ethic of nurses in a rural hospital in KwaZulu Natal shaped by a deep history of mission medicine and changing forms of new public management. Liberal democratic principles of transparency, decentralization and rights though promising freedom from control often generate fear and insecurity instead. But despite the pressures they face Elizabeth Hull shows that nurses draw on a range of practices from international migration to new religious movements to assert new forms of citizenship. Focusing an anthropological lens on professionalism Hull explores the major fault lines of South Africa's fragmented social landscape: class, gender, race and religion to make an important contribution to the study of class formation and citizenship. This prize winning monograph will be of interest to scholars of anthropology, development studies, sociology and global public health. *Health Telematics Education* John Mantas, 1997. This volume focuses on the activities on Health Telematics Education. In Europe coordinated activities in healthcare informatics education started in the late 1980s with the establishment of European Courses in Health Telematics. At the same time the European Commission foresaw the need for spreading the knowledge of IT in the Healthcare Sector. Therefore the EC since then have supported the initiatives that aim to create awareness, stimulate diffusion, educate and train the users, healthcare professionals in the application of Information Technology to the Healthcare Sector. Such an initiative is the NIGHTINGALE project which is an essential project in the planning and implementation of strategy, training the Nursing profession in using and applying healthcare information systems as well as the IT EDUCTRA project which covers a more wide spectrum of the Health Telematics Education. The objective of this book is to promote the appropriate use of the developed Telematics infrastructure across Europe by educating and training healthcare professionals in a harmonising way across Europe in the upcoming field of Health and Nursing Informatics. For achieving this objective the European Commission established a series of European Conferences on Health Telematics Education and Workshops by experts, users, developers and policymakers. In this book the Proceedings of the first European Conference in Health Telematics Education HTE 96 organised by the NIGHTINGALE project and supported by the IT EDUCTRA project are included as well as the minutes and the presentations of the NIGHTINGALE Workshops. **Juta's Statutes of South Africa** South Africa, 2004. *Contac* , 1998 *Resources in Education* , 1999 *The Drama of South Africa* Loren Kruger, 2005-11-01.
