Committee on Commerce, Science, and Transportation, **The Jewish Calendar Controversy of 921/2 CE** Sacha Stern, 2019-09-02 In the year 921/2 the Jewish leaders of Palestine and Babylonia disagreed on how to calculate the calendar This led the Jews of

the entire Near East to celebrate Passover and the other festivals through two years on different dates. The controversy was major but it became forgotten until its late 19th century rediscovery in the Cairo Geniza. Faulty editions of the texts in the following decades led to much misunderstanding about the nature, leadership and aftermath of the controversy. In this book, Sacha Stern re-edits the texts, completely discovers many new Geniza sources and challenges the historical consensus. This book sheds light on early medieval Rabbanite leadership and controversies and on the processes that eventually led to the standardization of the medieval Jewish calendar.

Towards an Islamic Lunisolar Calendar Hisham Abad, 2021-04-10

The Calendar was invented in ancient times to allow nations to pace their economic and social activities with climatic seasons. Throughout the history of civilizations, much depended on organizing and administering an accurate calendar. Hunter-gatherers needed the calendar to predict the migrations of herds of wild animals. As humanity advanced, farming communities required calendars to predict the coming of rain or the time of the flooding of rivers. Traders and seafaring communities needed to map the best time of the year to tackle the dangers of seas when sailing far from home. In contemporary times of globalization, calendars have become even more critical in optimizing the complex supply chains of local and global production cycles.

Oral traditions ascertain that the Arabs of the Arabian Peninsula used a rudimentary lunisolar calendar called in the literature the Arabian Calendar. Like with all nations, the lunisolar Arabian Calendar helped the Arabs organize their meager resources in the best ways possible. For example, research showed that the Hajj season and its pan-Arabian markets were scheduled to coincide with the date harvesting season, peaking from July to September. The abundance of the date harvest available in this period, along with assigning the concept of inviolability to the Arabian months spanning this season, allowed them to travel across Arabia to Mecca to trade in the pan-Arabian markets and to participate in the religious rituals of their pilgrimage, the Hajj. It is asserted in this book that Prophet Muhammad followed the lunisolar Arabian Calendar all his life. At the end of the tenth year after he migrated from Mecca to Medina and during his Farewell Pilgrimage, the Qur'an sternly abolished the process of intercalation, i.e. the *Nasī'*, the very process which allowed the Arabs to organize their various economic and religious activities. When Caliph Umar ibn al-Khattab initiated the Hijri Calendar seven years after Prophet Muhammad's death, i.e. in 17 AH, he founded it as purely lunar, which meant its months were allowed to float within the solar year. Caliph Umar is famous for his zeal in protecting the fundamental Islamic principle of monotheism. This *Ishāh* was the reason for introducing the Hijri Calendar as purely lunar because *Nasī'*, i.e. Quraysh's method of intercalation, was hopelessly entangled with the polytheistic religion of Quraysh, the Prophet's tribe and the guardian of the holy places in Mecca and its environs. The harmful effects of following the purely lunar Hijri Calendar were realized from early on. But the prohibition of *Nasī'* inhibited the early Islamic caliphs from reforming the Hijri Calendar. This book explores the history of the Arabian Calendar and its intimate connection with the Hijri Calendar. The main findings of this book are as follows:

1. The main Hajj shrines in Mecca are aligned in the direction of sunrises and sunsets of the Summer Solstice day.
2. Quraysh intercalated its

Arabian Calendar by forcing the Summer Solstice SS Day to occur within the 11th month of the Arabian Calendar Shaww l The Nas month was added when the onset of the SS was about to transfer to into the 11th month Dh l Qa da 3 The onset of the SS day was determined through the sunset alignment along the line joining the posts of al Wos and al Aqaba Jamar t and also by observing the sun rising from behind the peak of mount Thab r from the location of the sacrificial altar of pre Islamic Mina 4 The Prophet arrived in his migration from Mecca to Med na on the Days of sh r which corresponded to the dates of 8th of Rab I the 10th of the Hebrew month Tishri and to the 23rd of September 632 5 The epoch of the Hijri Calendar must be adjusted back by two days from the epoch used so far 6 The Farewell Pilgrimage occurred in autumn on September 4 632 CE not in spring on March 11 632 CE
