Multi-Objective Optimization in Computer Networks Using Metaheuristics Yezid Donoso, Ramon Fabregat, 2016-04-19

Metaheuristics are widely used to solve important practical combinatorial optimization problems. Many new multicast applications emerging from the Internet such as TV over the Internet, radio over the Internet and multipoint video streaming require reduced bandwidth consumption, end-to-end delay and packet loss ratio. It is necessary to design an The British National Bibliography Arthur James Wells, 2007 **Metaheuristics for Multiobjective Optimisation** Xavier Gandibleux, Marc Sevaux, Kenneth Sörensen, Vincent T'Kindt, 2012-08-27. The success of metaheuristics on hard single objective optimization problems is well recognized today. However, many real life problems require taking into account several conflicting points of view corresponding to multiple objectives. The use of metaheuristic optimization techniques for multi objective problems is the subject of this volume. The book includes selected surveys, tutorials and state of the art research papers in this field which were first presented at a free workshop jointly organized by the French working group on Multi objective Mathematical Programming PM2O and the EURO working group on Metaheuristics in December 2002. It is the first book which considers both various metaheuristics and various kind of problems e.g. combinatorial problems, real situations, non linear problems applied to multiple objective optimization. Metaheuristics used include genetic algorithms, ant colony optimization, simulated annealing, scatter search etc. Problems concern timetabling, vehicle routing and more. Methodological aspects such as quality evaluation are also covered. **Multi-Objective Optimization Using Evolutionary Algorithms** Kalyanmoy Deb, 2001-07-05. Kalyanmoy Deb introduces readers to multi objective optimisation in a systematic and coherent manner, supplying all of the necessary background information. *Advances in Multi-Objective Nature Inspired Computing* Carlos Coello Coello, Clarisse Dhaenens, Laetitia Jourdan, 2010. The purpose of this book is to collect contributions that deal with the use of nature inspired metaheuristics for solving multi objective combinatorial optimization problems. Such a collection intends to provide an overview of the state of the art developments in this field with the aim of motivating more researchers in operations research, engineering and computer science to do research in this area. As such, this book is expected to become a valuable reference for those wishing to do research on the use of nature inspired metaheuristics for solving multi objective combinatorial optimization problems. *Multi-Objective Optimization in Theory and Practice II* André A. Keller, 2019. Multi Objective Optimization in Theory and Practice is a simplified two part approach to multi objective optimization MOO problems. This second part focuses on the use of metaheuristic algorithms in more challenging practical cases. The book includes ten chapters that cover several advanced MOO techniques. These include the determination of Pareto optimal sets of solutions, metaheuristic algorithms, genetic search algorithms and evolution strategies, decomposition algorithms, hybridization of different metaheuristics and many objective more than three objectives optimization and parallel computation. The final section of the book presents information about the design and types of fifty test problems for which the

Pareto optimal front is approximated For each of them the package NSGA II is used to approximate the Pareto optimal front
It is an essential handbook for students and teachers involved in advanced optimization courses in engineering information science and mathematics degree programs
