and Climate Change Ian Bache,Ian Bartle,Matthew Flinders,Greg Marsden,2015-09-30 Based on a major three year research project this book explores the various roles of political actors and the policies that deal with the governance of reducing transport related carbon emissions Using this clear and globally crucial example of climate change governance the authors are able to tease apart a range of debates and dilemmas and to fully explore the nature pace and significance of core policies designed to tackle climate change Much research in the field has over emphasized the international realm and global

policy whereas this text uncovers the huge importance that domestic policy development plays in reducing emissions It highlights normative positions that lie at the heart of institutional structures enabling broader debates into the capacity and future of democratic governance *Network Governance and the Differentiated Polity* R. A. W. Rhodes, 2017-06-30 *Network Governance and the Differentiated Polity* is the first of two volumes featuring a selection of key writings by R A W Rhodes Volume I collects in one place for the first time the main articles written by Rhodes on policy networks and governance between 1990 and 2005 The introductory section provides a short biography of the author s journey Part I focuses on policy networks and Part II focuses on governance The conclusion provides critical commentary both replying to critics and reflecting on theoretical developments since publication The volume complements the author s other publications on networks and governance and many chapters in the volume feature an afterword setting out the context in which it was written and identifying what has changed empirically Volume II looks forward and explores the interpretive turn and its implications for the craft of political science especially public administration **Configurations, Dynamics and Mechanisms of Multilevel Governance** Nathalie Behnke, Jörg Broschek, Jared Sonnicksen, 2019-02-01 This edited volume provides a comprehensive overview of the diverse and multi faceted research on governance in multilevel systems The book features a collection of cutting edge trans Atlantic contributions covering topics such as federalism decentralization as well as various forms and processes of regionalization and Europeanization While the field of multilevel governance is comparatively young research in the subject has also come of age as considerable theoretical conceptual and empirical advances have been achieved since the first influential works were published in the early noughties The present volume aims to gauge the state of the art in the different research areas as it brings together a selection of original contributions that are united by a variety of configurations dynamics and mechanisms related to governing in multilevel systems *Policy Change and Innovation in Multilevel Governance* Benz, Arthur, 2021-11-19 Multilevel governance divides powers includes many veto players and requires extensive policy coordination among different jurisdictions Under these conditions innovative policies or institutional reforms seem difficult to achieve However while multilevel systems establish obstructive barriers to change they also provide spaces for creative and experimental policies incentives for learning and ways to circumvent resistance against change As the book explains appropriate patterns of multilevel governance linking diverse policy arenas to a loosely coupled structure are conducive to policy innovation *Community, Scale, and Regional Governance* Liesbet Hooghe, Gary Marks, 2016-08-18 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self government The first has to do with the character of the public goods provided by government their scale economies externalities and informational asymmetries The

second has to do with how people conceive and construct the groups to which they feel themselves belonging In this book the authors demonstrate that scale and community are principles that can help explain some basic features of governance including the growth of multiple tiers over the past six decades how jurisdictions are designed why governance within the state has become differentiated and the extent to which regions exert authority The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring one must engage human passions regarding self rule to explain variation in the structures of rule over time and around the world Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford
