Translational Spaces Yifeng Sun, 2020-12-29 This book explores the concept of space or rather spaces in relation to translation to construct a conceptual framework for research to better understand and solve translation problems A number of interrelated spatial perspectives on translation supported by empirical evidence are presented to help better understand the complexities between China and West in cultural exchanges

and to offer a way of explaining what happens to translation and why it takes on a particular form In the chequered history of Chinese Western cultural exchange effective communication has remained a great challenge exacerbated by the ultimate inescapability of linguistic and cultural incommensurability It is therefore necessary to develop conceptual tools that can help shed light on the interactive association between performativity and space in translation Despite the unfailing desire to connect with the world transnational resistance is still underway in China Further attempts are required to promote a convergence of Chinese and Western translation theories in general and to confront problems arising from translation practice in particular This work will be of interest to students and scholars in translation studies around the world as well as those working in cultural studies and cross cultural communication studies Borrowed Forms Kathryn
