Multilevel Environmental Governance Inger Weibust, James Meadowcroft, 2014-03-28 The literature on Multi level governance MLG an approach that explicitly looks at the system of the many interacting authority structures at work in the global political economy has grown significantly over the last decade The authors in this volu

Handbook of Energy Governance in Europe Michèle Knodt, Jörg Kemmerzell, 2022-09-21 This Handbook provides the most comprehensive account of energy governance in Europe examining both energy governance at the European level and the development of energy policy in 30 European countries Authored by leading scholars the first part of the book offers a broad overview of the topics of energy research including theories of energy transitions strategies and norms of energy policy governance instruments in the field and challenges of energy governance In the second part it examines the internal and external dimensions of energy governance in the European Union The third part presents in depth country studies which investigate national trajectories of energy policy including an analysis of the policy instruments and coordination mechanisms for energy transitions It closes with a comparative analysis of national energy governance This book is a definitive resource for scholars in energy and climate research as well as decision makers in national governments and EU institutions

Governing Europe's Marine Environment Michael Gilek, 2016-03-03 Governing Europe's Marine Environment is a coherent up to date multidisciplinary analysis of current approaches and challenges to the sustainable governance of Europe's marine environment Structured in three parts Part 1 outlines general theoretical ideas about governance governing and governability and serves as a starting point for analysing the development of marine governance in Europe from the perspective of different disciplines Part 2 includes studies of EU marine governance Part 3 focuses on Europe's regional seas namely the Baltic Sea the North Sea the Black Sea and the Mediterranean Sea This book presents a better understanding of the fragmented governance of marine governance in Europe and in particular the tension between the Europeanization of regional seas and the regionalization of EU policies

Time and Environmental Law Benjamin J. Richardson, 2017-08-03 Disciplined by industrial clock time modern life distances people from nature's biorhythms such as its ecological evolutionary and climatic processes The law is complicit in numerous ways It compresses time through fast track legislation and accelerated resource exploitation It suffers from temporal inertia such as grandfathering existing activities that limits the law's responsiveness to changing circumstances Insouciance about past ecological damage and neglect of its restoration are equally serious temporal flaws we cannot live sustainably while Earth remains degraded and unrepaired Applying international and interdisciplinary perspectives on these issues Time and Environmental Law explores how to align law with the ecological timescape and enable humankind to tell nature's time Lending insight into environmental behaviour and impacts this book pioneers a new understanding of environmental law for all societies and makes recommendations for its reform Minding nature not the clock requires regenerating Earth adapting to its changes and living more slowly

The

Oxford Handbook of Comparative Environmental Law Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law. It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points: country studies from all continents; responses to common problems including air pollution, water management, nature conservation, genetically modified organisms, climate change, and energy; chemicals waste; and foundational components of environmental law systems including principles, property rights, administrative and judicial organisation, command and control, regulation, market mechanisms, informational techniques, and liability mechanisms, and common interactions of environmental protection with the broader public, private, and criminal law contexts. The volume brings together the foremost authorities in this field from around the world to provide a concise, self-contained, and technically rigorous account of environmental law as a single overall system.

European Networks and Cultural Governance Carlotta Scioldo, 2024-11-26 This book explores the transformative role of networks within the European Union (EU) over the past three decades, particularly in relation to the cultural and creative sectors. Examining how informal collaborations evolved into structured entities that have reshaped EU cultural governance and fostered cross-border cooperation among cultural professionals, the book employs case studies to reveal how EU-funded networks influence local creative practices and policy discourse and drive ideational change. It introduces new analytical frameworks to assess networks as agents of multilevel cross-sectoral transformation. By blending institutional and ethnographic analyses, the book challenges traditional views of EU cultural policy, arguing that cultural networks not only promote European integration but also balance economic, cultural, social, and environmental priorities. It positions these networks as central to the development of a transnational European cultural space, advancing both symbolic and structural integration. This book is essential reading for scholars, policymakers, and cultural professionals, providing fresh insights into the evolving dynamics between cultural networks, policymaking, and creative ecosystems in Europe. The analysis offers a unique perspective for a strategic conceptualisation of cultural policymaking, envisioning a future where cultural actors play a pivotal role in shaping the European cultural landscape and governance.

Water Policy and Governance in Canada Steven Renzetti, Diane P. Dupont, 2016-10-31 This book provides an insightful and critical assessment of the state of Canadian water governance and policy. It adopts a multidisciplinary variety of perspectives and considers local, basin, provincial, and national scales. Canada's leading authorities from the social sciences, life, and natural sciences address pressing water issues in a non-technical language, making them accessible to a wide audience. Even though Canada is seen as a water-rich country with 7% of the world's reliable flow of freshwater and many of the world's largest rivers, the country nevertheless faces a number of significant water-related challenges stemming in part from supply-demand imbalances but also a range of water quality issues. Against the backdrop of a water policy landscape that has changed significantly in recent years, this book therefore seeks to examine water-related issues that are not only important for the future of Canadian water

management but also provide insights into transboundary management non market valuation of water decentralized governance methods the growing importance of the role of First Nations peoples and other topics in water management that are vital to many jurisdictions globally The book also presents forward looking approaches such as resilience theory and geomatics to shed light on emerging water issues Researchers students and those directly involved in the management of Canadian waters will find this book a valuable source of insight In addition this book will appeal to policy analysts people concerned about Canadian water resources specifically as well as global water issues

The Law of the Sea and Climate Change Elise Johansen, Signe Veierud Busch, Ingvild Ulrikke Jakobsen, 2020-12-17 Explores how the law of the sea can develop in support of the objectives of the United Nations climate regime

Water Policy Reform in Southern Alberta B. Timothy Heinmiller, 2016-01-01 In *Water Policy Reform in Southern Alberta* B. Timothy Heinmiller looks at how and why these and other reforms were adopted after nearly a century of stasis on water policy

Managing Federalism through Pandemic Kathy L. Brock, Geoffrey Hale, 2023-11-07 *Managing Federalism through Pandemic* summarizes and analyses multiple policy dimensions of Canada's response to the COVID 19 pandemic and related policy issues from the perspective of Canadian federalism Contributors address the relative effectiveness of intergovernmental cooperation at the summit level and in policy fields including emergency management public health national security Indigenous Peoples and governments border governance crisis communications fiscal federalism income security policies CERB supply chain resilience and interacting energy and climate policies Despite serious policy failures of individual governments repeated fluctuations in the overall effectiveness of pandemic management and growing public frustration across provinces and regions contributors show how processes for intergovernmental cooperation adapted reasonably well to the pandemic's unprecedented stresses particularly at the outset The book concludes that despite individual policy failures Canada's decentralized approach to policy management often enabled regional adaptation to varied conditions helped to contain serious policy failures and contributed to various degrees of policy learning across governments *Managing Federalism through Pandemic* reveals how the pandemic exposed structural policy weaknesses which transcend federalism but have significant implications for how governments work together or don't to promote the well being of citizens

Aquaculture Law and Policy Nigel Bankes, Irene Dahl, David L. VanderZwaag, 2016-09-28 With aquaculture operations fast expanding around the world the adequacy of aquaculture related laws and policies has become a hot topic This much needed book provides a three part guide to the complex regulatory landscape The expert contributors first review the international legal dimensions including chapters on law of the sea trade and access and benefit sharing Part Two offers regional perspectives discussing the EU and regional fisheries management organizations The final part contains eleven case studies exploring how leading aquaculture producing countries have been putting sustainability principles into practice

Climate Change in Cities Sara Hughes, Eric K. Chu, Susan G. Mason, 2017-09-27 This book presents pioneering work on a range of innovative practices experiments and

ideas that are becoming an integral part of urban climate change governance in the 21st century. Theoretically, the book builds on nearly two decades of scholarship identifying the emergence of new urban actors, spaces, and political dynamics in response to climate change priorities. However, it further articulates and applies the concepts associated with urban climate change governance by bridging formerly disparate disciplines and approaches. Empirically, the chapters investigate new multi-level urban governance arrangements from around the world and leverage the insights they provide for both theory and practice. Cities, both as political and material entities, are increasingly playing a critical role in shaping the trajectory and impacts of climate change action. However, their policy planning and governance responses to climate change are fraught with tension and contradictions. While on one hand, local actors play a central role in designing institutions, infrastructures, and behaviors that drive decarbonization and adaptation to changing climatic conditions, their options and incentives are inextricably enmeshed within broader political and economic processes. Resolving these tensions and contradictions is likely to require innovative and multi-level approaches to governing climate change in the city: new interactions, new political actors, new ways of coordinating and mobilizing resources, and new frameworks and technical capacities for decision making. We focus explicitly on those innovations that produce new relationships between levels of government, between government and citizens, and among governments, the private sector, and transnational and civil society actors. A more comprehensive understanding is needed of the innovative approaches being used to navigate the complex networks and relationships that constitute contemporary multi-level urban climate change governance.

Debra Roberts, Co-Chair, Working Group II, IPCC 6th Assessment Report, AR6 and Acting Head, Sustainable and Resilient City Initiatives, Durban, South Africa. Climate Change in Cities offers a refreshingly frank view of how complex cities and city processes really are. Christopher Gore, Associate Professor and Chair, Department of Politics and Public Administration, Ryerson University, Canada. This book is a rare and welcome contribution, engaging critically with questions about cities as central actors in multilevel climate governance, but it does so recognizing that there are lessons from cities in both the Global North and South. Harriet Bulkeley, Professor of Geography, Durham University, United Kingdom. This timely collection provides new insights into how cities can put their rhetoric into action on the ground and explores just how this promise can be realised in cities across the world, from California to Canada, India to Indonesia.

Democracy and Climate Change Frederic Hanusch, 2017-07-28. Democracy and Climate Change explores the various ways in which democratic principles can lead governments to respond differently to climate change. The election cycle can lead to short-termism, which often appears to be at odds with the long-term nature of climate change, with its latency between cause and effect. However, it is clear that some democracies deal with climate change better than others, and this book demonstrates that overall, stronger democratic qualities tend to correlate with improved climate performance. Beginning by outlining a general concept of democratic efficacy, the book provides an empirical analysis of the influence of the quality of democracy on climate change performance across dozens of countries. The specific case

study of Canada's Kyoto Protocol process is then used to explain the mechanisms of democratic influence in depth. The wide ranging research presented in the book opens up several new and exciting avenues of enquiry and will be of considerable interest to researchers with an interest in comparative politics, democracy studies and environmental policies. The International Rule of Law Heike Krieger, Georg Nolte, Andreas Zimmermann, 2019-08-07. This edited volume examines the role of international law in a changing global order. Can we under the current significantly changing conditions still observe an increasing juridification of international relations based on a universal understanding of values? Or are we to the contrary facing a tendency towards an informalization or a reformation of international law or even an erosion of international legal norms? Would it be appropriate to revisit classical elements of international law in order to react to structural changes which may give rise to a more polycentric or non polar world order? Or are we simply observing a slump in the development towards an international rule of law based on a universal understanding of values? In eleven chapters distinguished scholars reflect on how to approach these questions from historical system oriented and actor centered perspectives. The contributions engage with the rise of European international law since the 17th century, the decay of the international rule of law, compliance as an indicator for the state of international law, international law and informal law making in times of populism, the rule of environmental law and complex problems, human rights in Europe in a hostile environment, the influence of the BRICS states on international law, the impact of non state actors on international law, international law's contribution to global justice, the contestation of value based norms and the international rule of law in light of legitimacy claims.

Environmental Policy Michael E. Kraft, Barry G. Rabe, Norman J. Vig, 2023-10-20. As environmental issues continue to become more prevalent in society and surrounding policy challenges become more complex, *Environmental Policy* once again brings together top scholars to evaluate the changes and continuities in American environmental policy since the late 1960s and their implications for current policy. Students will learn to decipher the underlying trends, institutional constraints and policy dilemmas that shape today's environmental politics as they evaluate approaches to future challenges.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Intergovernmental Panel on Climate Change, 2012-05-28. Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters. This Special Report explores the social as well as physical dimensions of weather and climate related disasters considering opportunities for managing risks at local to international scales. SREX was approved and accepted by the Intergovernmental Panel on Climate Change (IPCC) on 18 November 2011 in Kampala, Uganda.

On Environmental Governance Oran R Young, 2016-01-08. In *On Environmental Governance* Oran R Young examines a variety of efforts to meet the challenge of governing human interaction with the environment in the interest of sustainability. At the same time he considers measures to minimize restrictions on human

actors in using their natural resources Young looks at issues including climate change biodiversity deforestation greenhouse gas emissions and carbon cycle disruption in exploring impacts from the local to the global The book draws on general ideas about the nature of governance while exploring new models for governing human environment relations [A 'Macro-regional' Europe in the Making](#) Stefan Gänzle, Kristine Kern, 2015-10-19 Macro regional strategies seek to improve the interplay of the EU with existing regimes and institutions and foster coherence of transnational policies Drawing on macro regional governance and Europeanization this edited volume provides an overview of processes of macro regionalization in Europe displaying evidence of their significant impact [Can We Price Carbon?](#) Barry G. Rabe, 2018-04-06 A political science analysis of the feasibility and sustainability of carbon pricing drawing from North American European and Asian case studies Climate change economists generally agree is best addressed by putting a price on the carbon content of fossil fuels by taxing carbon by cap and trade systems or other methods But what about the politics of carbon pricing Do political realities render carbon pricing impracticable In this book Barry Rabe offers the first major political science analysis of the feasibility and sustainability of carbon pricing drawing upon a series of real world attempts to price carbon over the last two decades in North America Europe and Asia Rabe asks whether these policies have proven politically viable and if adopted whether they survive political shifts and managerial challenges over time The entire policy life cycle is examined from adoption through advanced implementation on a range of pricing policies including not only carbon taxes and cap and trade but also such alternative methods as taxing fossil fuel extraction These case studies Rabe argues show that despite the considerable political difficulties carbon pricing can be both feasible and durable **Environmental Governance of the São Paulo Macrometropolis** Pedro Roberto Jacobi, Alexander Turra, Célio Bermann, Edmilson Dias de Freitas, Klaus Frey, Leandro Luiz Giatti, Luciana Travassos, Paulo Antônio de Almeida Sinisgalli, Sandra Momm, Silvia Zanirato, Pedro Henrique Campello Torres, 2024-07-24 This book presents a set of chapters produced by six research groups that developed the São Paulo Research Foundation FAPESP Thematic Project Environmental Governance of the São Paulo macrometropolis SPMM in the face of Climate Variability 2017 2022 It represents an academic experience based on the articulation of knowledge and interdisciplinary dialogue For this publication the individual research groups benefitted from internal expertise and interdisciplinary input reflecting the collaborative process of the entire team The SPMM is characterized by the diversity and complementarity of economic social and environmental functions exercised in its territory comprising 174 municipalities with the capital city of São Paulo as its polarizing center It is structured from a set of five metropolitan regions two urban agglomerates and one micro region not institutionalized in the State of São Paulo sheltering around 34 million people who inhabit the richest and economically strongest region in Brazil The SPMM one of the urban territorial clusters of greatest expression in the southern hemisphere is a strategic arena for the formulation and implementation of planning governance and trans and multi scalar regional public policies The English translation of this book from its Portuguese
