Video coding standards K.R. Rao, Do Nyeon Kim, Jae Jeong Hwang, 2013-10-07 The requirements for multimedia especially video and audio communications increase rapidly in the last two decades in broad areas such as television entertainment interactive services telecommunications conference medicine security business traffic defense and banking Video and audio coding standards play most important roles in multimedia communications In order to meet these requirements series of video and audio coding standards have been developed such as MPEG 2 MPEG 4 MPEG 21 for audio and video by ISO IEC H 26x for video and G 72x for audio by ITU T Video Coder 1 VC 1 for video by the Society of Motion Picture and Television Engineers SMPTE and RealVideo RV 9 for video by Real Networks AVS China is the abbreviation for Audio Video Coding Standard of China This new standard includes four main technical areas which are systems video audio and digital copyright management DRM and some supporting documents such as consistency verification The second part of the standard known as AVS1 P2 Video Jizhun was approved as the national standard of China in 2006 and several final drafts of the standard have been completed including AVS1 P1 System Broadcast AVS1 P2 Video Zengqiang AVS1 P3 Audio Double track AVS1 P3 Audio 5 1 AVS1 P7 Mobile Video AVS S P2 Video and AVS S P3 Audio AVS China provides a technical solution for many applications such as digital broadcasting SDTV and HDTV high density storage media Internet streaming media and will be used in the domestic IPTV satellite and possibly the cable TV market Comparing with other coding standards such as H 264 AVC the advantages of AVS video standard include similar performance lower complexity lower implementation cost and licensing fees This standard has attracted great deal of attention from industries related to television multimedia communications and even chip manufacturing from around the world Also many well known companies have joined the AVS Group to be Full Members or Observing Members The 163 members of AVS Group include Texas Instruments TI Co Agilent Technologies Co Ltd Envivio Inc NDS Philips Research East Asia Aisino Corporation LG Alcatel Shanghai Bell Co Ltd Nokia

China Investment NCIC Co Ltd Sony China Ltd and Toshiba China Co Ltd as well as some high level universities in China Thus there is a pressing need from the instructors students and engineers for a book dealing with the topic of AVS China and its performance comparisons with similar standards such as H 264 VC 1 and RV 9 **Pattern Recognition and Image**
