At a time when our country seems increasingly polarized over the value and meaning of justice for all, her insights and suggestions are as needed as ever.

Evolving Multicultural Education for Global Classrooms Gordon, Richard Keith,Ahmed, Kawser,Hosoda, Miwako,2021-06-18 Multicultural education is a construct that has been very useful for many years in harboring sensitivities teachers need in addressing diverse students Now the discipline needs refreshing In the global society the idea of multicultural education a decidedly Western formation needs to expand its conceptual boundaries Salient issues in multicultural education such as individual identities social justice and equity are bedrock concerns of multicultural educators These concepts are considered necessary but not sufficient in shaping an evolving model of multicultural education The complexity of humans and modern and emerging societies requires a broadened scope of the understanding of contemporary multicultural theory and practice Evolving Multicultural Education for Global Classrooms addresses multicultural education

from a comprehensive viewpoint that acknowledges the historical benefit of multicultural education and recognizes a need to inform the discipline with a broader viewpoint. As most knowledge on multicultural education comes from a Western perspective and the scholarship on the topic is weakening, the chapters in this book present new practices and classroom applications that are internationally transferable. Topics covered include teacher education, social justice, educational equity and inclusion, online education, and cultural sensitivities. This book is ideally intended for teachers, educational theorists, sociologists of education, inservice and preservice teachers, administrators, teacher educators, practitioners, researchers, academicians, and students interested in a fresh global perspective on multicultural education.

Rethinking Multicultural Education Carol Korn-Bursztyn, Alberto M. Bursztyn Ph.D., 2002-03-30 Korn and Bursztyn and their contributors examine the cultural transitions that children make as they move between the cultures of home and school. To better understand these transitions, they explore how educators understand their students' shifting experiences and examine how educators also negotiate transitions as they too move from home to school each day. The narratives or case studies reflect this shifting gaze from child to teacher to parents and take up the various relational configurations that these can form amongst and between each other. They turn a critical eye toward instances of classroom practice and school life, connecting personal knowledge with school change. In some cases, the authors draw directly on autobiographical material, linking these to a reflective approach to teaching. Avoiding the celebratory tone that often attends discussions of multiculturalism, the authors address how diversity engages us in continual renegotiation of the personal and social. The perspectives of educators and of teacher candidates are presented, and the construction of cultural identity and its impact on schools is explored. In illuminating the complicated nature of cultural transitions and the obligation of schools to create places in which children and families of diverse backgrounds can thrive, they highlight how multiculturalism can play a transformative role in the lives of children and schools. A must reading for educators and graduate students in education, school psychology, guidance, and counseling.

Multicultural Education as Social Activism Christine E. Sleeter, 1996-01-01 Connecting multicultural education with political issues of power and struggle, this book explores what multicultural education means to white people given the unequal racial power relations in the U.S. and worldwide. It examines connections between race, gender, and social class, particularly as these connections play out for white women. While taking a feminist perspective, the author is also wary of the power white middle-class women exercise in defining what counts as gender issues. Throughout the book, Sleeter argues that multicultural education was born in political struggle and can never meaningfully be disconnected from politics. Ultimately, the quest for schooling for social justice is a political quest rather than a technical issue.
