

INTRODUCTION

GENERAL

The instructions contained in this on-ride manual are for the information and guidance of servicemen who are responsible for overhauling and repairing International V-461, V-461, V-549 and V5-549 carbureted engines.

This manual provides the servicemen with a fast, convenient reference to information on operation, maintenance and repairs, as well as descriptions of the major units and their functions in relation to other components of the power units.

LUBRICATION

Instructions on the lubrication of each assembly are given in the Lubrication Chart in the Operator's Manual. When assembling any parts, always coat all wearing surfaces with the lubricant specified in the chart. Use sufficient quantities of lubricant to prevent any danger of seizing, scoring or excessive wear when the assembly is first operated. Failure to provide "starting lubrication" may result in serious damage.

SERVICE TOOLS

Our engines are designed so that few service tools are required other than those in the mechanic's tool kit. Whenever the application of inexpensive special service equipment will facilitate work, it is shown. Otherwise, it is assumed that servicemen will select from their tool kits such tools as are required. Information regarding special tool equipment is given in the "Service Tools" manual IS-1631. The On-Farm Line Distributors have most of this equipment and are in an excellent position to service these engines.

Order all such from:

SERVICE PARTS

Our power units deserve genuine IH service parts. The best material obtainable, and experience gathered through many years of power equipment manufacturing, enable International Harvester to produce quality that will not be found in imitation or "just as good" repair parts. No serviceman can afford to guarantee a repair job that is not serviced with genuine IH parts. No owner should be satisfied with other than genuine IH parts.

For the correct service parts to be used on a machine, always refer to the parts catalog for the particular machine. The loose-leaf parts catalogs are accurate and are continuously being brought up to date by the issuance of new pages covering any changes in part numbers.

SERIAL NUMBERS

Engine and chassis serial numbers can be located readily on IH power units - engine numbers being stamped on the crankcase where they are easily visible, and power unit chassis numbers on name plates attached to the flywheel housing.
