Reading Time Catherine Compton-Lilly, 2015-04-24 While teachers cannot travel back in time to visit their students at earlier ages they can draw on the rich sets of experiences and knowledge that students bring to classrooms In her latest book Catherine Compton Lilly examines the literacy practices and school trajectories of eight middle school students and their families Through a unique longitudinal lens the author has studied these same students from first grade we see how students from a low income inner city community grow and develop academically revealing critical insights for teachers about literacy development identity construction and school achievement Based on interviews reading assessments and writing samples *Reading Time* advocates for educators to Provide opportunities for students to develop long term relationships with teachers and administrators Allow children and parents to share their stories to identify obstacles that students encounter as they move through school Collaborate and learn from students former

teachers as well as inform their future teachers. Develop portfolio systems and longitudinal records that highlight children's emerging interests, abilities, and potential for the future.

Catherine Compton Lilly is an associate professor in Curriculum and Instruction at the University of Wisconsin-Madison. She has taught in the public school system for 18 years. Her books include *Reading Families*, *Re-reading Families*, and *Bedtime Stories and Book Reports*. The analysis here runs deeper than other contemporary critiques of accountability regimes and standardization, inviting us instead to consider how time, schooling, and literacy have always been co-constructed. *Reading Time* features compelling examples of literacy practices that traverse generations, which could only be understood through interviews and observations extending over time.

Overtested Jessica Zacher-Pandya, 2015-04-24 This timely book explores what is often overlooked in policy debates about the education of English language learners: how the day-to-day dynamics of the classroom are affected by high-stakes testing and the pressures students and teachers experience and internalize as a result. The author presents and analyzes classroom observations, student work, and test scores, as well as interviews with students and teachers. A disturbing picture of today's overtested public school classroom emerges from the events and practices described in this book. While hard to believe, all the depictions presented took place in a real elementary school classroom and reflect the current culture of extreme accountability. *Overtested* not only describes the flaws in our current accountability system but it also provides real-world solutions that can have an immediate and positive effect at the classroom, state, and national level. Chapters address key debates such as how to measure proficiency, the validity of various language assessment tools, the overuse of assessment, and the risks and benefits of teaching language arts to English language learners via mandated structured curricula.

Jessica Zacher-Pandya is an Associate Professor in the Departments of Teacher Education and Liberal Studies at California State University Long Beach. This book tells an important tale that cannot be conveyed by numbers and tables. It is important information for teachers, for those who employ and train teachers, and for those who create the policies under which teachers are required to operate.

From the Foreword by Robert Rueda, University of Southern California, author of *The 3 Dimensions of Improving Student Performance: Finding the Right Solutions to the Right Problems*. How many more dire tales of schooling for assessment must be told before we realize that teaching and testing are not the same, and that scores on standardized multiple-choice achievement tests are a sorry substitute for an engaging learning environment?

In this book, Jessica Zacher-Pandya reaches across ideological and institutional borders to offer reasonable, pragmatic solutions for change.

Linda Valli, Jeffrey David Mullan, Professor of Teacher Education, Professional Development, College of Education, University of Maryland.

Zacher-Pandya's invaluable book exposes the injustices and absurdities of our high-stakes accountability era. Just as importantly, it limns a more academically robust and culturally relevant instructional vision for English language learners.
